OUTLINE HISTORY OF NEW JERSEY.

Within the limits of what is now the State of New Jersey, aside from any evidences of the presence of prehistoric man in the "Trenton Gravels," the original inhabitants of the commonwealth were Lenni Lenape, or Delaware, Indians. This subdivision of the great Algonkin family occupied the river valleys of the State, had made some progress in agriculture and in elementary arts, were peaceable but small in numbers, and at last have become totally extinct in this portion of the United States.

In its settlement, New Jersey was not an English colony. The claims of the Crown, based upon early discovery and various grants, were totally ignored by two great commercial nations of Europe—Holland and Sweden. It was not until 1664, practically a half century after the first occupancy of New Jersey by a white man, that England had aught more than a slight influence upon the destinies of the State. In settlement, Holland was first to send out planters, under the auspices of the Dutch West India Company. Claiming both the valleys of the Hudson and the Delaware, by virtue of the explorations of Hudson and Mey, land was taken up upon the banks of the Hudson, Passaic, Hackensack, Raritan and smaller streams tributary to New York harbor, as well as at Gloucester upon the Delaware. By 1630 these claims were well established by occupancy, and by the creation of a centre of local government in what is now New York city. Upon the rapidly growing influence of Holland, Sweden looked with jealous eye. Gustavus Adolphus, in his plan to make Sweden a world-power, saw the Dutch to be dangerous rivals in America. In 1638 there was equipped a Swedish expedition to settle the valley of the Delaware. What is now the State of Delaware, the valley of the Schuylkill and isolated portions of the west bank of the Delaware River were occupied, civil and military government was established, and the colony of farmers and traders entered upon a brief career of prosperity. The death of Gustavus Adolphus, internal dissensions in Sweden, the inherent weakness of the Delaware settlements, and the constantly increasing power of Holland brought matters to a crisis. In 1655 New Sweden was conquered by New Netherlands,

and for nine years the soil of New Jersey was absolutely under Dutch control.

Emerging from the interregnum of the Cromwells, the restoration of the House of Stuart brought peace to England. On the 12th of March, 1664, Charles II., with royal disregard for previous patents, grants and charters, deeded to his brother James, Duke of York, a vast tract embracing much of New England, New York and all of what is now New Jersey. This was accompanied by active preparations to drive the Dutch from America, as they, in alien claims to New Jersey, practically separated the New England colonies from Virginia, Maryland and the Carolinas. In the summer of 1664 armed vessels appeared in New York harbor. After negotiations, the Dutch surrendered and the power of Holland in North America became simply a matter of history. In the meantime James, Duke of York, transferred to two favorites of the House of Stuart—John, Lord Berkeley, and Sir George Carteret—practically what is now the State of New Jersey. In honor of Carteret's defense of the Island of Jersey (Caesarea) during the Parliamentary wars, the territory was called New Jersey (Nova Caesarea).

Carteret and Berkeley, in granting a liberal frame of government and extolling the advantages of their colony so well located for agriculture, commerce, fishing and mining, attracted settlers not only from England, but from Scotland and New England, particularly Long Island and Connecticut. These planters were largely Calvinists, from Presbyterian and Congregational communities, and mainly occupied land in Newark, Elizabeth and upon the north shore of Monmouth county. The valley of the Delaware remained unsettled. The Calvinists brought into East Jersey distinctive views upon religious and civil matters. Early legislatures punished many crimes by death, the penalties being similar to those of the Jewish dispensation, while the "town-meeting" strengthened the individual action of the small communities. There was an intense individualism in every phase of political and religious development, the life of the people centering around the church and the school house, the head of both, as in New England, being the minister.

In 1676 a division of the interests of Carteret and Berkeley occurred. In the meantime Berkeley had disposed of his rights to a company of English Quakers, a conflict had ensued, and to establish the claims of all parties concerned, the two colonies of East and West Jersey came into existence. A line was drawn from a point in Little Egg

Harbor to the Delaware Water Gap, Berkeley and his assigns retaining West Jersey as their moiety, Carteret obtaining East Jersey.

By Berkeley's transfer the dominant influence in West Jersey was that of the Society of Friends. Salem was settled in 1675, Burlington, Gloucester and the site of Trenton about five years later, while within ten years thereafter the "shore" communities of Cape May and Tucker-ton came into existence. The Society of Friends established in West Jersey a series of communities in which the life of the people was different from that of East Jersey. As East Jersey resembled New England in civil government, so West Jersey resembled Virginia. The political and social centres of the large plantations were the shire-towns, slave owning was common, a landed aristocracy was established, prominent families intermarried, and under the advice of William Penn and his friends good faith was kept with the Indians. Capital punishment was practically unknown and disputes were settled frequently by arbitration.

Two elements of discord marked the genesis of East Jersey and of West Jersey. One, external, was the attitude of the Duke of York after he became James II. In 1673 New Jersey was recaptured by the Dutch, who held the colony until the early spring of 1674. A question arose as to the Duke of York's title after 1674, reconveyances were made, but in spite of past assurances, James II. claimed the proprietary right of government. To that end Sir Edmund Andros was commissioned Governor of New Jersey, and a climax was reached in 1680 when the proprietary governor of East Jersey was carried prisoner to New York. In 1681 the Crown recognized the justice of the proprietors' contention, and local government was re-established, but not before the seeds of discontent were sown that bore fruit in the Revolutionary War.

An internal disturbance was a contest between the Boards of Proprietors and the small land owners. Both in East and West Jersey, Carteret and Berkeley and their assigns had transferred to wealthy combinations of capitalists—most of whom were non-residents—much of the broad acreage of the colonies. With the land went the right of selection of Governors and of members of Executive Councils, which right Berkeley and Carteret had derived from the Crown. This, with "quit-rent" agitations in East Jersey, led to much bitterness. Finally, disgusted with turmoil, and viewing a sentiment of revolt on the part of the people, the Boards of Proprietors sur-

rendered to the Crown, in 1702, their rights of government, retaining only their interest in the soil, East and West Jersey were united, and the two provinces became the royal colony of New Jersey.

From 1702 until the outbreak of the Revolution the political history of the colony was quite uneventful. Throughout the period of seventy-five years there was almost constant friction between the Legislature and the Governor and his Council. The governors, in the main, were Crown favorites sent over the sea without a personal knowledge of the colony and with but an ill-concealed ambition to wrest from the people as much money as could be secured for the support of themselves and the executive office. The Councils, composed of wealthy land owners of the Society of Friends and rich merchants from East Jersey, were quiescent, and even the members of the popular branch of the Legislature were chosen by those possessing property qualifications. The small non-voting farmers raised the cry of "aristocracy," and the equivalent of "taxation without representation," and while loyal to the Crown were open in their expressions of dissatisfaction to the personal attitude of their governors. In 1738 New Jersey, in recognition of this sentiment, was given a governor separate from the one appointed jointly for the colonies of New York and New Jersey.

During this period the farm was the centre of the activities of the life of the people; particularly was this true in the western part of the colony, where favoring climate and soil, slave labor and the proximity of Philadelphia led to abundant crops and a good market. In East Jersey a commercial spirit was more active. Perth Amboy threatened to rival New York, and Jersey ships from Newark, Elizabeth and the Monmouth villages were to be found from Boston to Charleston. The repressive economic policy of the Crown precluded the development of manufactures. In the southern part of the State, sand and unlimited forests of oak and pine led to the development of glass making, while "bog iron," with abundance of lime from oyster shells, gave an impetus to the erection of forges and bloomeries. These, as well as the copper mines of the trap rock region, were throttled by adverse Parliamentary legislation. Ship building was a recognized industry, and cedar was extensively "mined" from the sunken forests of the tide-water district. Whaling and other fisheries were unhampered, and were profitable, as was also the trade in skins and in hay from the salt meadows of the coast.

Throughout the years from 1702 to 1776 gold and silver and copper money was scarce. In obedience to the demand of the English merchants that competition should be crushed, legislation was enacted to draw "hard" money away from the colony. An inflated paper currency, first issued in 1707 to provide ways and means to aid the Canadian expedition against the French, poured from the printing presses. Trade was reduced to barter, and gold, silver and copper were practically at a premium for nearly three generations.

Of the more prominent incidents during the period were the organized attempts to suppress piracy in New York and Delaware bays, the growth of a well-defined system of transportation by land and water between New York and Philadelphia, the establishment of ferries and post roads, the reclamation of waste land, the injection of Huguenot, Scotch-Irish and Palatinate German elements into the settled population, the chartering of Princeton University and Rutgers College, the religious revival led by Whitefield, the propagation of abolition doctrines by Woolman, the erection of a series of barracks owing to the French and Indian war, and what is probably of supreme importance, the growth of a sentiment of independence fostered by the stupid policy of the Crown, and carried from hamlet to hamlet, as much by itinerant hawkers and by "Redemptioners," who had served their time, as by any other cause.

The opening of the Revolution found New Jersey's sentiment unevenly crystalized. Few, if any, were favoring absolute independence. There were three elements. One, the Tory party, was led by Governor William Franklin, the illegitimate son of Benjamin Franklin. This conservative class embraced nearly all the Episcopalians, a vast proportion of the non-combatant members of the Society of Friends and some East Jersey Calvinists. Another element was composed of men of various shades of belief, some in favor of continual protest, others desirous of compromise. This included at the outbreak of the struggle most of the Calvinists, some few Quakers of the younger generation, and the Scotch-Irish. The third party drew its support from a few bold, aggressive spirits of influence whose following included men who believed that war for independence would benefit their fortunes.

The part played in the Revolution by New Jersey has been frequently told. Events passed rapidly after the affairs of Trenton and Princeton; Monmouth and Red Bank will never be forgotten, while the raids at Salem, Spring-

field, Elizabeth, in the valley of the Hackensack, and the winter at Morristown are a part of national history. Occupying a position between New York and Philadelphia, its soil was a theatre where the drama of war was always presented. At no time was the Tory element suppressed, finding its expression in open hostility, or in the barbaric cruelties of the "Pine Robbers" of Monmouth, Burlington, Gloucester and Salem counties. Though under suspicion, the Society of Friends were neutral, for conscience sake, remaining close to the teachings of their creed.

The close of the struggle found the people of New Jersey jubilant and not disposed to relinquish their sovereignty. The Articles of Confederation were weak and had become a by-word and a jest. There was much State pride and much aristocratic feeling among the old families who continued to dominate State politics. The Constitution of 1776, adopted by New Jersey as a makeshift war measure, provided that all State officers of prominence should be elected by a Legislature, which was chosen by voters possessing property qualifications. As in the colony, the Governor was Chancellor, and class distinctions were closely drawn. In spite of agitation, all proposed changes were rejected, and a strong federal union with the other States was viewed with dislike and suspicion. The State, in a quarrel with New York, at one time refused to obey the requests of Congress, and, in the exercise of her sovereignty, established a Court of Admiralty and coined money.

While the spirit of "State rights" was dominant, it was recognized by leaders of public thought that New Jersey was too weak to stand alone. She entered the Annapolis convention called to revise the Articles of Confederation, and whose lasting monument was the present Federal Constitution adopted in Philadelphia in 1787. Upon the 15th of June of that year the "New Jersey Plan" was presented, which, while lost as a measure, led to the famous compromise upon representation, whereby in the Senate of the United States the States were given equal vote, with a representation based on population in the House.

The adoption of the Constitution of the United States led to the rapid growth of political parties in New Jersey as elsewhere. In spite of the intense conservatism of the State, led by the Quakers of West Jersey, who were Federalists almost to a man, the anti-Federalist sentiment developed rapidly, spurred by a virulent party press, the death of men who had been trained in colonial methods of thought and the democratic tendency of the Methodist Episcopal Church, which grew in strength in West Jersey.

In the eastern part of the State there was among the individualistic Calvinists a strong anti-Federal spirit. This, in 1800, led to the election of Thomas Jefferson as President of the United States, and in 1801 the election of his political ally, Joseph Bloomfield, as Governor of the State of New Jersey. The death of Hamilton at the hands of Burr, and the death of Livingston, the "war" Governor, tore down the strongest pillars of Federalism in New Jersey, and led to the absolute domination of the State by the anti-Federalists, who held power until the outbreak of the second war with England.

The period from 1790 to 1812 in New Jersey was marked by a demand for internal improvements and better transportation. The agitation concerning the Delaware and Raritan Canal, Stevens' experiments in 1802 with steam, along the lines laid down in 1785 by Fitch, the project of the Society for Establishing Useful Manufactures at Paterson as early as 1791, and highways conducted through the northwest portion of the State, indicate the trend of public sentiment.

The second war with England was not altogether a popular measure in New Jersey. The Federalists, the "Peace Party," secured control of the Legislature and elected their Governor. Nevertheless the State furnished her quota of troops. The one permanent effect of the struggle upon the State was indirect. Owing to the movement of supplies and the necessity of quick transportation between Philadelphia and the exposed port of New York, the wagon roads between Bordentown and Perth Amboy, and between Trenton, New Brunswick, Metuchen, Rahway, Elizabeth and Newark, were improved and their advantages as "short routes" demonstrated. Upon these lines two later railroads, now a part of the Pennsylvania Railroad system, were constructed.

The era following the close of the war of 1812 until the opening of the Civil War was one of stupendous activity. Interrupted only by the financial depressions of 1817 and 1837, and slightly retarded by the Mexican War, the progress of the State was beyond the wildest dreams of the enthusiast, Alexander Hamilton. In the eastern part of the State, aided by a constantly increasing foreign population, Jersey City rose from the marshes, Newark grew toward her present greatness, Paterson became a centre of industry, while in the west, Camden was recognized as an available site for manufactures. The public school system was established and extended, reforms in the caring for the criminal, defective, delinquent and dependent

classes were instituted, railroads were reaching every town of size, in the vicinity of New York and Philadelphia, ferries were erected, banks established, post offices opened and newspapers printed. In 1844, when social unrest was most marked, the present State Constitution was adopted by a large popular majority and needed reforms tending to elevate the legal position of married women, imprisoned debtors and bankrupts were adopted.

The year 1860 brought a termination to the then impending conflict. While every other State north of Mason and Dixon's line by 1850 had set the black man free, there were still 236 negroes in bondage in New Jersey. The abolition movement made slow progress and an anti-war party had a decided following. But when the die was cast New Jersey responded to the call for men and money. She furnished 88,305 men, or within 10,501 of her entire militia. For organizing, subsisting, supplying, supporting and transporting her troops she paid \$2,894,385, and upon the field sustained the reputation for bravery she had won during the days of Trenton and Monmouth.

Since the Civil War New Jersey has become the centre of marvelous activity in nearly every line of human progress. Her mills clothe multitudes; within her borders are found the termini of every railroad system of the United States, with one exception, penetrating the South and West; her market gardens feed 5,000,000 people; a series of cities arisen upon the desolate sands of the sea shore furnish health and pleasure to hundreds of thousands of visitors; her mines supply iron, zinc and copper; her fisheries are world-famous, and her farms and dairies are models.

DECLARATION OF INDEPENDENCE

OF THE

UNITED STATES.

When, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident: that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these are life, liberty and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it, and to institute a new government, laying its foundations on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established should not be changed for light and transient causes; and accordingly, all experience hath shown that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But, when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security. Such has been the patient sufferance of these colonies, and such is now the necessity which constrains them to alter their former systems of government. The history of the present king of Great Britain is a history of repeated injuries and usurpations, all having, in direct object, the establishment of an absolute tyranny over these States. To prove this, let facts be submitted to a candid world:

He has refused his assent to laws the most wholesome and necessary for the public good.

He has forbidden his Governors to pass laws of immediate and pressing importance, unless suspended in their operations till his assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other laws for the accommodation of large districts of people, unless those people would relinquish the right of representation in the Legislature—a right inestimable to them, and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable and distant from the repository of their public records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved representative houses repeatedly, for opposing, with manly firmness, his invasions on the rights of the people.

He has refused, for a long time after such dissolutions, to cause others to be elected; whereby the legislative powers, incapable of annihilation, have returned to the people at large for their exercise; the State remaining, in the meantime, exposed to all the dangers of invasions from without, and convulsions within.

He has endeavored to prevent the population of these States; for that purpose, obstructing the laws for the naturalization of foreigners; refusing to pass others to encourage their migration hither, and raising the conditions of new appropriations of lands.

He has obstructed the administration of justice, by refusing his assent to laws for establishing judiciary powers.

He has made judges dependent on his will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of new offices, and sent hither swarms of officers to harass our people, and eat out their substance.

He has kept among us in times of peace, standing armies, without the consent of our Legislatures.

He has affected to render the military independent of, and superior to, the civil power.

He has combined, with others, to subject us to a jurisdiction foreign to our constitutions, and unacknowledged by our laws; giving his assent to their acts of pretended legislation:

For quartering large bodies of armed troops among us;

For protecting them, by a mock trial, from punishment, for any murders which they should commit on the inhabitants of these States;

For cutting off our trade with all parts of the world;

For imposing taxes on us without our consent;

For depriving us, in many cases, of the benefit of trial by jury;

For transporting us beyond seas to be tried for pretended offenses;

For abolishing the free system of English laws in a neighboring province, establishing therein an arbitrary government, and enlarging its boundaries, so as to render it at once an example and fit instrument for introducing the same absolute rule into these colonies;

For taking away our charters, abolishing our most valuable laws, and altering, fundamentally, the forms of our governments;

For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated government here, by declaring us out of his protection, and waging war against us.

He has plundered our seas, ravaged our coasts, burned our towns, and destroyed the lives of our people.

He is, at this time, transporting large armies of foreign mercenaries to complete the works of death, desolation and tyranny, already begun, with circumstances of cruelty and perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the head of a civilized nation.

He has constrained our fellow-citizens, taken captive on the high seas, to bear arms against their country, to become the executioners of their friends and brethren, or to fall themselves by their hands.

He has excited domestic insurrection among us, and has endeavored to bring on the inhabitants of our frontiers, the merciless Indian savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these oppressions, we have petitioned for redress, in the most humble terms; our repeated petitions have been answered only by repeated injury. A prince whose character is thus marked by every act which may define a tyrant, is unfit to be the ruler of a free people.

Nor have we been wanting in our attentions to our British brethren. We have warned them, from time to time, of attempts by their Legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them, by the ties of our common kindred, to disavow these usurpations, which would inev-

itably interrupt our connections and correspondence. They, too, have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our separation, and hold them, as we hold the rest of mankind, enemies in war, in peace, friends.

We, therefore, the representatives of the United States of America, in General Congress assembled, appealing to the Supreme Judge of the World for the rectitude of our intentions, do, in the name and by the authority of the good people of these colonies, solemnly publish and declare, that these United Colonies are, and of right ought to be, Free and Independent States; that they are also absolved from all allegiance to the British crown, and that all political connection between them and the State of Great Britain, is, and ought to be, totally dissolved; and that, as Free and Independent States, they have full power to levy war, conclude peace, contract alliances, establish commerce, and do all other acts and things which Independent States may of right do. And, for the support of this declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other, our lives, our fortunes and our sacred honor.

The actual enumeration shall be made within three years after the first meeting of the congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of representatives shall not exceed one for every thirty thousand, but each State shall have at least one representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to choose three; Massachusetts, eight; Rhode Island and Providence Plantations, one; Connecticut, five; New York, six; New Jersey, four; Pennsylvania, eight; Delaware, one; Maryland, six; Virginia, ten; North Carolina, five; South Carolina, five; and Georgia, three.

OFFICERS—IMPEACHMENT.

5. The house of representatives shall choose their speaker and other officers, and shall have the soie power of impeachment.

SENATE—HOW COMPOSED.

Section III.

1. The senate of the United States shall be composed of two senators from each State, chosen by the legislature thereof, for six years, and each senator shall have one vote.

ROTATION OF SENATORS.

2. Immediately after they shall be assembled, in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the senators of the first class shall be vacated at the expiration of the second year; of the second class, at the expiration of the fourth year; and of the third class, at the expiration of the sixth year, so that one-third may be chosen every second year. And if vacancies happen by resignation, or otherwise, during the recess of the legislature of any State, the executive thereof may make temporary appointments until the next meeting of the legislature, which shall then fill such vacancies.

THEIR QUALIFICATIONS.

3. No person shall be a senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.

THE SENATE'S POWERS.

6. The senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall be on oath or affirmation. When the President of the United States is tried, the chief justice shall preside. And no person shall be convicted without the concurrence of two-thirds of the members present.

7. Judgment, in cases of impeachment, shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust or profit under the United States; but the party convicted shall, nevertheless, be liable and subject to indictment, trial, judgment and punishment according to law.

MEMBERS OF CONGRESS—HOW ELECTED.

Section IV.

1. The times, places and manner of holding elections for senators and representatives shall be prescribed in each State, by the legislature thereof; but the congress may, at any time, by law, make or alter such regulations, except as to the places of choosing senators.

WHEN CONGRESS SHALL MEET.

2. Congress shall assemble at least once in every year; and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

POWERS AND DUTIES OF EACH HOUSE.

Section V.

1. Each house shall be the judge of the elections, returns and qualifications of its own members; and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members, in such manner and under such penalties as each house may provide.

RULES, &C.

2. Each house may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member.

JOURNALS.

3. Each house shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may, in their judgment, require secrecy; and the yeas and nays of the members of each house, on any question, shall, at the desire of one-fifth of those present, be entered on the journal.

ADJOURNMENT.

4. Neither house, during the session of congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two houses shall be sitting.

COMPENSATION, PRIVILEGES AND INCAPACITIES.

Section VI.

1. The senators and representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the treasury of the United States. They shall, in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at the session of their respective houses, and in going to and returning from the same; and for any speech or debate in either house, they shall not be questioned in any other place.

APPOINTMENT TO OFFICE.

2. No senator or representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased, during such time; and no person holding any office

under the United States, shall be a member of either house during his continuance in office.

REVENUE BILLS.

Section VII.

1. All bills for raising revenue shall originate in the house of representatives; but the senate may propose or concur with amendments, as on other bills.

PASSING BILLS, &C.

2. Every bill which shall have passed the house of representatives and the senate, shall, before it become a law, be presented to the President of the United States; if he approve, he shall sign it; but if not, he shall return it, with his objections, to that house in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If, after such reconsideration, two-thirds of that house shall agree to pass the bill, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered, and if approved by two-thirds of that house, it shall become a law. But in all such cases the votes of both houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each house respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law, in like manner as if he had signed it, unless the congress, by their adjournment, prevent its return, in which case it shall not be a law.

ORDERS AND RESOLUTIONS.

3. Every order, resolution or vote, to which the concurrence of the senate and house of representatives may be necessary (except on the question of adjournment), shall be presented to the President of the United States, and before the same shall take effect, shall be approved by him, or, being disapproved by him, shall be repassed by two-thirds of the senate and house of representatives, according to the rules and limitations prescribed in the case of a bill.

POWERS OF CONGRESS.

Section VIII.

The congress shall have power:

1. To lay and collect taxes, duties, imposts and excises, to pay the debts and provide for the common defense, and

general welfare of the United States; but all duties, imposts and excises shall be uniform throughout the United States.

2. To borrow money on the credit of United States;

Section IX.

1. The migration or importation of such persons as any of the States now existing shall think proper to admit, shall not be prohibited by the congress, prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

2. The privilege of the writ of habeas corpus shall not be suspended, unless, when in cases of rebellion or invasion, the public safety may require it.

3. No bill of attainder, or ex post facto law shall be passed.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

5. No tax or duty shall be laid on articles exported from any State. No preference shall be given, by any regulation of commerce or revenue, to the ports of one State over those of another; nor shall vessels bound to or from one State, be obliged to enter, clear or pay duties in another.

6. No money shall be drawn from the treasury, but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

7. No title of nobility shall be granted by the United States; and no person holding any office of profit or trust under them, shall, without the consent of the congress, accept of any present, emolument, office or title of any kind whatever, from any king, prince or foreign State.

LIMITATIONS OF THE POWERS OF INDIVIDUAL STATES.

Section X.

1. No State shall enter into any treaty, alliance or confederation; grant letters of marque and reprisal; coin money; emit bills of credit; make anything but gold and silver coin a tender in payment of debts; pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts; or grant any title of nobility.

2. No State shall, without the consent of the congress,

lay any imposts or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws; and the net produce of all duties and imposts laid by any State on imports or exports, shall be for the use of the treasury of the United States; and all such laws shall be subject to the revision and control of the congress.

3. No State shall, without the consent of congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit delay.

ARTICLE II.

THE EXECUTIVE POWER.

Section I.

1. The executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice-President, chosen for the same term, be elected as follows:

HOW ELECTED.

2. Each State shall appoint, in such manner as the legislature thereof may direct, a number of electors equal to the whole number of senators and representatives to which the State may be entitled in congress; but no senator or representative, or person holding an office of trust or profit under the United States, shall be appointed an elector.

ELECTORAL COLLEGES.

3. The electors shall meet in their respective States, and vote by ballot, for two persons, of whom one, at least, shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each; which list they shall sign and certify, and transmit, sealed, to the seat of the government of the United States, directed to the president of the senate. The president of the senate shall, in the presence of the senate and house of representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed; and if there be more than one who have such majority, and have an equal number of votes, then the house of representatives shall immediately

choose by ballot, one of them for President; and if no person have a majority, then from the five highest on the list, the said house shall in like manner choose the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors, shall be the Vice-President. But if there should remain two or more who have equal votes, the senate shall choose from them, by ballot, the Vice-President. [See XIIth amendment.]

4. The congress may determine the time of choosing the electors, and the day on which they shall give their votes, which day shall be the same throughout the United States.

WHO MAY BE ELECTED PRESIDENT.

5. No person except a natural born citizen, or a citizen of the United States at the time of the adoption of this constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years, and been fourteen years a resident within the United States. [See XIIth amendment.]

ON THE DEATH, REMOVAL, &C., OF THE PRESIDENT, THE POWERS AND DUTIES DEVOLVE UPON THE VICE-PRESIDENT.

6. STATE CONSTITUTION.

A CONSTITUTION agreed upon by the delegates of the people of New Jersey, in convention begun at Trenton on the fourteenth day of May, and continued to the twenty-ninth day of June, in the year of our Lord one thousand eight hundred and forty-four, ratified by the people at an election held on the thirteenth day of August, A. D. 1844, and amended at a special election held on the seventh day of September, A. D. 1875, and at another special election held on the twenty-eighth day of September, A. D. 1897.

We, the people of the State of New Jersey, grateful to Almighty God for the civil and religious liberty which He hath so long permitted us to enjoy, and looking to Him for a blessing upon our endeavors to secure and transmit the same unimpaired to succeeding generations, do ordain and establish this Constitution:

ARTICLE I.

RIGHTS AND PRIVILEGES.

1. All men are by nature free and independent, and have certain natural and unalienable rights, among which are those of enjoying and defending life and liberty; acquiring, possessing and protecting property, and of pursuing and obtaining safety and happiness.

2. All political power is inherent in the people. Government is instituted for the protection, security and benefit of the people, and they have the right at all times to alter or reform the same, whenever the public good may require it.

3. No person shall be deprived of the inestimable privilege of worshipping Almighty God in a manner agreeable to the dictates of his own conscience; nor, under any pretense whatever, to be compelled to attend any place of worship contrary to his faith and judgment; nor shall any person be obliged to pay tithes, taxes or other rates for building or repairing any church or churches, place or places of worship, or for the maintenance of any minister or ministry, contrary to what he believes to be right, or has deliberately and voluntarily engaged to perform.

4. There shall be no establishment of one religious sect in preference to another; no religious test shall be required as a qualification for any office or public trust; and no person shall be denied the enjoyment of any civil right merely on account of his religious principles.

5. Every person may freely speak, write and publish his sentiments on all subjects, being responsible for the abuse of that right. No law shall be passed to restrain or abridge the liberty of speech or of the press. In all prosecutions or indictments for libel, the truth may be given in evidence to the jury; and if it shall appear to the jury that the matter charged as libelous is true, and was published with good motives and for justifiable ends, the party shall be acquitted; and the jury shall have the right to determine the law and the fact.

6. The right of the people to be secure in their persons, houses, papers and effects, against unreasonable searches and seizures, shall not be violated; and no warrant shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched and the papers and things to be seized.

7. The right of a trial by jury shall remain inviolate; but the legislature may authorize the trial of civil suits, when the matter in dispute does not exceed fifty dollars, by a jury of six men.

8. In all criminal prosecutions the accused shall have the right to a speedy and public trial by an impartial jury; to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel in his defense.

9. No person shall be held to answer for a criminal offense, unless on the presentment or indictment of a grand jury, except in cases of impeachment, or in cases cognizable by justices of the peace, or arising in the army or navy; or in the militia, when in actual service in time of war or public danger.

10. No person shall, after acquittal, be tried for the same offense. All persons shall, before conviction, be bailable by sufficient sureties, except for capital offenses, when the proof is evident or presumption great.

11. The privilege of the writ of habeas corpus shall not be suspended, unless in case of rebellion or invasion the public safety may require it.

12. The military shall be in strict subordination to the civil power.

13. No soldier shall, in time of peace, be quartered in

any house without the consent of the owner; nor in time of war, except in a manner prescribed by law.

14. Treason against the State shall consist only in levying war against it, or in adhering to its enemies, giving them aid and comfort. No person shall be convicted of treason, unless on the testimony of two witnesses to the same overt act, or on confession in open court.

15. Excessive bail shall not be required, excessive fines shall not be imposed, and cruel and unusual punishments shall not be inflicted.

16. Private property shall not be taken for public use without just compensation; but land may be taken for public highways as heretofore, until the legislature shall direct compensation to be made.

17. No person shall be imprisoned for debt in any action, or on any judgment founded upon contract, unless in cases of fraud; nor shall any person be imprisoned for a militia fine in time of peace.

18. The people have the right freely to assemble together, to consult for the common good, to make known their opinions to their representatives, and to petition for redress of grievances.

19. No county, city, borough, town, township or village shall hereafter give any money or property, or loan its money or credit, to or in aid of any individual association or corporation, or become security for or be directly or indirectly the owner of any stock or bonds of any association or corporation.

20. No donation of land or appropriation of money shall be made by the State or any municipal corporation to or for the use of any society, association or corporation whatever.

21. This enumeration of rights and privileges shall not be construed to impair or deny others retained by the people.

ARTICLE II.

RIGHT OF SUFFRAGE.

1. Every male citizen of the United States, of the age of twenty-one years, who shall have been a resident of this State one year, and of the county in which he claims his vote five months, next before the election, shall be entitled to vote for all officers that now are, or hereafter may be, elective by the people; provided, that no person in the military, naval or marine service of the United States shall be considered a resident in this State, by being sta-

2. Each house shall be the judge of the elections, returns and qualifications of its own members, and a majority of

each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members, in such manner, and under such penalties, as each house may provide.

3. Each house shall choose its own officers, determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, may expel a member.

4. Each house shall keep a journal of its proceedings, and from time to time publish the same; and the yeas and nays of the members of either house on any question shall, at the desire of one-fifth of those present, be entered on the journal.

This section shall not be construed to refer to any money that has been, or may be, deposited with this State by the government of the United States.

2. No lottery shall be authorized by the legislature or otherwise in this State, and no ticket in any lottery shall be bought or sold within this State, nor shall pool-selling, book-making or gambling of any kind be authorized or allowed within this State, nor shall any gambling device, practice or game of chance now prohibited by law be legalized, or the remedy, penalty or punishment now provided therefor be in any way diminished.

3. The legislature shall not pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or depriving a party of any remedy for enforcing a contract which existed when the contract was made.

4. To avoid improper influences which may result from intermixing in one and the same act such things as have no proper relation to each other, every law shall embrace but one object, and that shall be expressed in the title. No law shall be revived or amended by reference to its title only; but the act revived, or the section or sections amended, shall be inserted at length. 9. No private, special or local bill shall be passed unless public notice of the intention to apply therefor, and of the general object thereof, shall have been previously given. The legislature, at the next session after the adoption hereof, and from time to time thereafter, shall prescribe the time and mode of giving such notice, the evidence thereof, and how such evidence shall be preserved.

10. The legislature may vest in the circuit courts, or courts of common pleas within the several counties of this State, chancery powers, so far as relates to the foreclosure of mortgages and sale of mortgaged premises.

And members-elect of the senate or general assembly are hereby empowered to administer to each other the said oath or affirmation.

2. Every officer of the legislature shall, before he enters upon his duties, take and subscribe the following oath or affirmation: "I do solemnly promise and swear [or affirm] that I will faithfully, impartially and justly perform all the duties of the office of _____, to the best of my ability and understanding; that I will carefully preserve all records, papers, writings or property intrusted to me for safe-keeping by virtue of my office, and make such disposition of the same as may be required by law."

ARTICLE V.

EXECUTIVE.

1. The executive power shall be vested in a governor.

2. The governor shall be elected by the legal voters of this State. The person having the highest number of votes shall be the governor; but if two or more shall be equal and highest in votes, one of them shall be chosen governor by the vote of a majority of the members of both houses in joint meeting. Contested elections for the office of governor shall be determined in such manner as the legislature shall direct by law. When a governor is to be elected by the people, such election shall be held at the time when and at the places where the people shall respectively vote for members of the legislature.

3. The governor shall hold his office for three years, to commence on the third Tuesday of January next ensuing the election for governor by the people, and to end on the

Monday preceding the third Tuesday of January, three years thereafter; and he shall be incapable of holding that office for three years next after his term of service shall have expired; and no appointment or nomination to office shall be made by the governor during the last week of his said term.

4. The governor shall be not less than thirty years of age, and shall have been for twenty years, at least, a citizen of the United States, and a resident of this State seven years next before his election, unless he shall have been absent during that time on the public business of the United States or of this State.

5. The governor shall, at stated times, receive for his services a compensation which shall be neither increased nor diminished during the period for which he shall have been elected.

6. He shall be the commander-in-chief of all the military and naval forces of the State; he shall have power to convene the legislature, or the senate alone, whenever in his opinion public necessity requires it; he shall communicate by message to the legislature at the opening of each session, and at such other times as he may deem necessary, the condition of the State, and recommend such measures as he may deem expedient; he shall take care that the laws be faithfully executed, and grant, under the great seal of the State, commissions to all such officers as shall be required to be commissioned.

7. Every bill which shall have passed both houses shall be presented to the governor; if he approve he shall sign it, but if not, he shall return it, with his objections, to the house in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it; if, after such reconsideration, a majority of the whole number of that house shall agree to pass the bill, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered, and if approved of by a majority of the whole number of that house, it shall become a law; but in neither house shall the vote be taken on the same day on which the bill shall be returned to it; and in all such cases, the votes of both houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each house respectively. If any bill shall not be returned by the governor, within five days (Sunday excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the legislature by their adjourn-

If any bill presented to the governor contain several items of appropriations of money, he may object to one or more of such items while approving of the other portions of the bill. In such case he shall append to the bill, at the time of signing it, a statement of the items to which he objects, and the appropriation so objected to shall not take effect. If the legislature be in session he shall transmit to the house in which the bill originated, a copy of such statement, and the items objected to shall be separately reconsidered. If, on reconsideration, one or more of such items be approved by a majority of the members elected to each house, the same shall be a part of the law, notwithstanding the objections of the governor. All the provisions of this section in relation to bills not approved by the governor shall apply to cases in which he shall withhold his approval from any item or items contained in a bill appropriating money.

8. No member of congress, or person holding an office under the United States, or this State, shall exercise the office of governor; and in case the governor, or person administering the government shall accept any office under the United States or this State, his office of governor shall thereupon be vacant. Nor shall he be elected by the legislature to any office under the government of this State or of the United States, during the term for which he shall have been elected governor.

9. The governor, or person administering the government, shall have power to suspend the collection of fines and forfeitures, and to grant reprieves, to extend until the expiration of a time not exceeding ninety days after conviction; but this power shall not extend to cases of impeachment.

10. The governor, or person administering the government, the chancellor, and the six judges of the court of errors and appeals, or a major part of them, of whom the governor, or person administering the government, shall be one, may remit fines and forfeitures, and grant pardons, after conviction, in all cases except impeachment.

11. The governor and all other civil officers under this State shall be liable to impeachment for misdemeanor in office during their continuance in office, and for two years thereafter.

12. In case of the death, resignation or removal from office of the governor, the powers, duties and emoluments of the office shall devolve upon the president of the senate, and in case of his death, resignation or removal, then upon the speaker of the house of assembly, for the time

being, until another governor shall be elected and qualified; but in such case another governor shall be chosen at the next election for members of the legislature, unless such death, resignation or removal shall occur within thirty days immediately preceding such next election, in which case a governor shall be chosen at the second succeeding election for members of the legislature. When a vacancy happens, during the recess of the legislature, in any office which is to be filled by the governor and senate, or by the legislature in joint meeting, the governor shall fill such vacancy and the commission shall expire at the end of the next session of the legislature, unless a successor shall be sooner appointed; when a vacancy happens in the office of clerk or surrogate of any county, the governor shall fill such vacancy, and the commission shall expire when a successor is elected and qualified. No person who shall have been nominated to the senate by the governor for any office of trust or profit under the government of this State, and shall not have been confirmed before the recess of the legislature, shall be eligible for appointment to such office during the continuance of such recess.

13. In case of the impeachment of the governor, his absence from the State or inability to discharge the duties of his office, the powers, duties and emoluments of the office shall devolve upon the president of the senate; and in case of his death, resignation or removal, then upon the speaker of the house of assembly for the time being, until the governor, absent or impeached, shall return or be acquitted, or until the disqualification or inability shall cease, or until a new governor be elected and qualified.

5. The present governor, or in case of his death or inability to act, the vice-president of council, together with the present members of the legislative council and secretary of state, shall constitute a board of state canvassers, in the manner now provided by law, for the purpose of ascertaining and declaring the result of the next ensuing election for governor, members of the house of representatives, and electors of president and vice-president.

6. The returns of the votes for governor, at the said next ensuing election, shall be transmitted to the secretary of state, the votes counted, and the election declared in the manner now provided by law in the case of the election of electors of president and vice-president.

7. The election of clerks and surrogates, in those counties where the term of office of the present incumbent shall expire previous to the general election of eighteen hundred and forty-five, shall be held at the general election next ensuing the adoption of this constitution; the result of which election shall be ascertained in the manner now provided by law for the election of sheriffs.

8. The elections for the year eighteen hundred and forty-four shall take place as now provided by law.

I, George Wurts, Secretary of State of the State of New Jersey, do hereby certify the foregoing to be a true copy of the Constitution of the State of New Jersey as amended, as the same is taken from and compared with the original Constitution and amendments thereto, now remaining on file in my office.

In testimony whereof, I have hereunto set my
[L. S.] hand and affixed my official seal, this twenty-sixth
day of October, A. D. eighteen hundred and ninety-
seven.

GEORGE WURTS.

BILLS AND JOINT RESOLUTIONS.

14. When a memorial or bill is referred to a committee praying or providing for an act of incorporation, or for any other act, notice of the application for which is required by law to be previously advertised, the committee shall not have leave to report such bill unless satisfactory evidence has been presented to the committee that the application for such act has had a bona fide advertisement according to law; and all committees reporting such bills referred to them shall certify to the Senate that such proof has been presented and is deemed satisfactory.

15. The titles of all bills and the parts of bills affected by amendments, together with the amendments, shall be entered on the Journal.

16. When leave is asked to bring in a bill, its title shall be read for the information of the Senate, and if objected to it shall be laid over for one day; and all public and pri-

vate bills and joint resolutions shall, after the first reading, be printed for the use of the Senate, but no other paper or document shall be printed without special order.

17. All bills and special reports of committees shall be numbered by the Secretary as they are severally introduced, and a list made of the same, and such bills and reports shall be called up by the President for consideration, in the order in which they are reported and stand upon the calendar, unless otherwise ordered; and the Secretary shall read from the said list or calendar, and not from the files of bills or reports.

18. No bill shall be committed or amended until it shall have been ordered to a second reading, after which it may be referred to a committee. Upon the written request of seven Senators to the Chairman of a Committee to which a bill shall have been referred, said Committee shall forthwith report such bill.

19. All bills may be made the order of a particular day, and public bills when called for shall have the preference of private bills; and when two or more bills shall be called for by Senators, they shall be taken up according to their seniority, reckoning from the date of their introduction.

20. On the second and third readings of bills and joint resolutions, printed copies thereof shall be used.

21. When bills or joint resolutions are introduced, the Secretary of the Senate shall forthwith deliver the same to the Supervisor of Bills, who shall prepare them for printing, in conformity with the rules defining the duties of said officer.

22. Original bills and joint resolutions, after being printed, shall be delivered by the Supervisor of Bills to the Secretary.

23. Bills and joint resolutions originating in and passed by the Senate and amended by the House, when concurred in by the Senate, shall be delivered by the Secretary to the Supervisor of Bills for re-printing.

24. Bills and joint resolutions which have passed their second reading, together with all amendments thereto, shall be delivered by the Secretary to the Supervisor of Bills, who shall see that the same are in proper form for printing for third reading.

25. When the Supervisor of Bills receives from the printer the bill or joint resolution ordered to a third reading and the same shall be found correct, he shall affix his official stamp to each page of the copy to be used as the official copy and intended to be submitted to the Governor for his approval, and shall deliver the same to the Secretary.

26. Two copies of every bill and of every joint resolution ordered to a third reading shall be printed on good bond paper, to be approved by the Supervisor of Bills, one of which copies shall be retained in his office and the other of which shall be delivered to the Secretary to be used thereafter as the official copy of said bill or joint resolution.

27. The Supervisor of Bills shall have printed for the use of the members of the Legislature at least one hundred copies of every bill or joint resolution ordered to a third reading, which shall be known and designated as "Official Copy Re-print." The Supervisor of Bills shall deliver twenty-one copies of all bills and joint resolutions designated as "Official Copy Re-print" to the Secretary of the Senate, and sixty copies to the Clerk of the House, and he shall retain the remainder in his own custody for the use of State and Legislative officers.

28. Except as otherwise provided, the system and procedure which have heretofore prevailed shall be followed in the preparation of all bills and joint resolutions for their various readings as far as practicable.

29. The consent of the majority of the Senators present shall be sufficient to print or re-print any bill or joint resolution, but no bill or joint resolution shall pass unless there shall be a majority of all the Senators personally present and agreeing thereto, and the yeas and nays of Senators voting on the final passage of any bill or joint resolution shall be entered on the Journal and the like entry on any other question shall be made at the desire of any Senator.

30. Every bill and joint resolution shall receive three readings previous to its being passed; and the President shall give notice at each reading whether it be the first, second or third, which readings shall be on three different days; but no bill or joint resolution reported adversely by the committee to which it shall have been referred shall receive a second reading except upon motion for that purpose made by or in the presence of the introducer of such bill or joint resolution and concurred in by a majority of all the Senators.

31. The final question upon the second reading of every bill or joint resolution originating in the Senate shall be whether it shall be read a third time; and no amendment shall be received at the third reading unless by unanimous consent of the Senators present, but it shall be in order, before the final passage of any such bill or joint resolution, to move its recommitment, and should such recommitment take place and any amendment be reported by the committee, the said bill or resolution shall be again read a second time and considered and the aforesaid question again put.

32. When a bill or joint resolution shall have been lost, and reconsidered and lost again, the same shall not again be reconsidered but by the unanimous consent of the Senate.

33. Bills and joint resolutions, when passed by the Senate, shall be signed by the President.

34. When a Senate bill or joint resolution shall have been passed, the same shall be signed, taken to the House of Assembly, and its concurrence therein requested, without a motion for that purpose.

35. When a bill or resolution passed by the Senate shall be carried to the House of Assembly, all papers and documents relating thereto on the files of the Senate shall be carried by the Secretary, with such bill or resolution, to the House of Assembly.

MOTIONS AND THEIR PRECEDENCE.

36. When a motion shall be made, it shall be reduced to writing by the President or any Senator, and delivered to the Secretary at his table and read before the same shall be debatable.

37. All motions entered on the Journal of the Senate shall be entered in the names of the Senators who make them.

38. If the question in debate contains several points, any Senator may have the same divided; but a motion to strike out and insert, or to commit with instructions, shall not be divided.

39. The rejection of a motion to strike out and insert one proposition shall not prevent a motion to strike out and insert a different proposition, nor prevent a subsequent motion simply to strike out; nor shall the rejection of a motion simply to strike out prevent a subsequent motion to strike out and insert.

40. On filling blanks the question shall be first taken on the largest sum, the greatest number, and the most distant day.

41. When motions are made for reference of the same subject to a Select Committee, and to a Standing Committee, the question of reference to a Standing Committee shall be put first.

42. When a question is before the Senate, no motion shall be received but—

1. To adjourn.
2. To proceed to the consideration of Executive business.
3. To lay on the table.
4. To postpone indefinitely.
5. To postpone to a certain day.
6. To commit.
7. To amend.

Which several motions shall have precedence in the order in which they stand arranged.

43. The motion to adjourn, or to fix a day to which the Senate shall adjourn, shall always be in order, except when a vote is being taken or while a Senator is addressing the Senate.

44. The motions to adjourn, to proceed to the consideration of Executive business, and to lay on the table, shall be decided without debate.

45. A motion to strike out the enacting clause of a bill shall have precedence of a motion to amend, and if carried shall be equivalent to its rejection.

46. When a motion shall have been once made and carried in the affirmative or negative, it shall be in order for any Senator who voted on the prevailing side to move a reconsideration thereof on the same day or next succeeding day of actual session; but no motion for the reconsideration of any vote shall be in order after a bill, resolution, message, report, amendment or motion upon which the vote was taken, announcing their decision, shall have gone from the possession of the Senate, and they shall not pass from the possession of the Senate until the expiration of the time in which a reconsideration is permitted; and every motion for reconsideration shall be decided by a majority of votes, except a motion to reconsider the vote on the final passage of a bill or joint resolution, which shall require the same majority as is necessary for their final passage.

MEMBERS.

47. The seats within the bar shall be reserved exclusively for the Senators, the officers of the Senate, and the reporters of the press who may have seats assigned them.

48. No Senator shall speak in any debate without rising, nor more than three times on any subject of debate, unless he shall first obtain leave of the Senate.

49. Every Senator, in speaking, shall address the President, confine himself to the question under debate, and avoid personality.

50. Any Senator may change his vote before the decision of the question shall have been announced by the Chair.

51. No Senator shall have his vote recorded on any question, when the yeas and nays are called, unless he shall be present to answer to his name.

MESSAGES.

52. All messages shall be sent to the House of Assembly by the Secretary, under the direction of the President, as a standing order, without a vote thereon.

53. Messages may be delivered at any stage of the business, except when a vote is being taken.

54. When a message shall be sent from the Governor or House of Assembly to the Senate, it shall be announced at the door by the Sergeant-at-Arms.

SENATE BILLS IN THE HOUSE.

55. When an amendment made in the Senate to a bill from the House of Assembly shall be disagreed to by that House, and not adhered to by the Senate, the bill shall be considered as standing on a third reading.

56. An amendment of the House of Assembly to a Senate bill shall not be divisible.

57. In case of disagreement between the Senate and House of Assembly, the Senate may either recede, insist and ask a conference, or adhere, and motions for such purposes shall take precedence in that order.

58. When a Senate bill shall be returned, amended by the House of Assembly, the sections of the bill so amended, together with the amendments, shall be read by the Secretary for a first reading and be entitled to a second reading without special motion, at which reading the proposed amendments shall be open to the action of the Senate. And if, at its third reading, upon the question being put by the President, "Will the Senate concur in the House amendment to Senate bill No. —?" a majority of the whole Senate should, by a vote of yeas and nays, concur, the question shall then be upon ordering the bill to be re-printed. If so ordered, the bill shall be re-printed, the amendments embodied therein and the re-printed bill examined and reported by the Committee on Printed Bills and read in open Senate, to the end that it may be known to be correctly printed, and shall be then signed and certified as other bills.

DISORDER.

59. In case of any disturbance in the gallery or lobby, the President shall have power to order the same to be cleared.

60. The Sergeant-at-Arms shall aid in the enforcement of order, under the direction of the President.

61. No Senator, in speaking, shall mention a Senator then present by his name.

SPECIAL ORDERS.

62. When the hour shall have arrived for the consideration of a special order, the same shall be taken up, and

the Senate shall proceed to consider it, unless it shall be postponed by the Senate.

63. The unfinished business in which the Senate shall have been engaged at the last preceding adjournment shall have the preference in the special order of the day.

64. No concurrent resolution shall pass unless by the consent of a majority of the Senators elected.

SECRET SESSION.

65. On motion made and seconded to shut the doors of the Senate on the discussion of any business which may, in the opinion of a Senator, require secrecy, the President shall direct the chamber to be cleared, and during the discussion of such motion the doors shall remain shut.

RULES.

66. No standing rule or order of the Senate shall be suspended unless by the consent of two-thirds of the Senators elected, nor rescinded or amended but by the same number, and one day's notice shall be given of the motion for rescission or amendment.

EXECUTIVE SESSION.

67. When nominations shall be made by the Governor to the Senate, they shall, unless otherwise ordered by the Senate, be referred to appropriate committees; and the final question on every nomination shall be, "Will the Senate advise and consent to this nomination?" which question shall not be put on the same day on which the nomination is received, nor on the day on which it may be reported by a committee, unless by the unanimous consent of the Senate.

68. When acting on Executive business the Senate shall be cleared of all persons except the Senators and Secretary.

69. All information or remarks concerning the character or qualifications of any persons nominated by the Governor to office shall be kept a secret.

70. The Legislative and Executive proceedings of the Senate shall be kept in separate and distinct books.

71. All nominations approved by the Senate, or otherwise definitely acted on, shall be transmitted by the Secretary to the Governor, with the determination of the Senate thereon, from day to day, as such proceedings may occur; but no further extract from the Executive journal shall be furnished, published or otherwise communicated, except by special order of the Senate.

72. When a bill is introduced amending an existing law, it shall in the body of the bill have new matter underscored, and matter proposed to be omitted, printed in its proper place, enclosed in brackets.

The introducer of a bill amending or supplementing an existing law shall designate at the head thereof the page of the Compiled Statutes, or the chapter of the Pamphlet Laws, where may be found the law proposed to be amended or supplemented.

When a bill has passed to a third reading, no special marks, underscoring or brackets shall be printed in the same.

It shall be the duty of the Secretary to cause any bill not complying with this rule to be redrawn, so as to conform hereto, and when reprinted to be restored to its place on the calendar.

HOUSE OF ASSEMBLY.

RULES ADOPTED THIS YEAR.

OF THE MEETING OF THE HOUSE.

1. Any member or members less than a quorum may meet and adjourn the House from day to day, when necessary.

2. Every member shall attend in his place precisely at the hour to which the House was last adjourned; and in case of neglect, he shall be subject to a reprimand from the Chair, unless excused by the House; nor shall any member absent himself from the House for more than the space of a quarter of an hour without leave previously obtained.

3. In case a less number of members than a quorum shall be present after the arrival of the hour to which the House stood adjourned, they are hereby authorized to send their Sergeant-at-Arms, or any other person or persons by them authorized, with a warrant duly executed, for any and all absent members, as the majority of such as are present may agree, and at the expense of such absent members, respectively, unless such excuse for non-attendance shall be rendered as the House, when a quorum is convened, shall judge sufficient. Immediately after the appointment of the Standing Committees, the members shall arrange among themselves their several seats appropriated to their counties; and in case of disagreement, the same shall be decided by lot.

OF THE DUTIES OF THE SPEAKER.

4. He shall take the chair at the hour to which the House shall have adjourned, and immediately call the members to order; and on the appearance of a quorum, shall cause the journal of the preceding day to be read, which may then be corrected by the House.

5. He shall preserve order and decorum, and in debate shall prevent personal reflections, and confine members to the question under discussion; but he shall not engage in any debate, nor propose his opinion on any question, without first calling on some member to occupy the chair. When two or more members rise at the same time, he shall name the one entitled to the floor.

6. He shall decide questions of order, subject to an appeal to the House, when demanded by any four members, on which appeal no member shall speak more than once, unless by leave of the House.

7. All questions before the House shall be stated by the Speaker, and distinctly put in the following form, to wit: "As many as are in favor of (the question) will say aye;" and after the affirmative is expressed, "Those of a contrary opinion, no." If the Speaker doubts, or a division be called for, the House shall divide; those in the affirmative of the question shall first rise from their seats, and afterwards those in the negative; and in case of an equal division, the Speaker shall decide.

8. All Committees shall be appointed by the Speaker, unless otherwise specially directed by the House.

9. All acts, addresses and joint resolutions shall be signed by the Speaker; and all writs, warrants and subpoenas issued by the order of the House shall be under his hand and seal, and attested by the Clerk. If the Speaker be absent, a less number of members than a quorum may appoint a Speaker pro tempore, who may sign any warrants, or perform any act requisite to bring in absent members.

10. He shall have a general direction of the hall, and he may name a member to perform the duties of the Chair; but such substitution shall not extend beyond a second adjournment.

OF THE ORDER OF BUSINESS.

11. After the reading of the journal, the business of the first meeting of each day shall be conducted in the following manner, to wit:

I. Letters, petitions and memorials, remonstrances and accompanying documents may be presented and disposed of.

II. Reports of Committees may be read.

III. Original resolutions may be offered and considered; items of unfinished business referred; motions to reconsider and to appoint additional members of Committees made; and leave of absence, leave to withdraw documents, and leave to introduce bills asked.

LEAVE FOR BILLS AND TO INTRODUCE BILLS.

IV. Bills and joint resolutions on a third reading may be taken up.

V. The House shall then proceed in the order of the day, preference being always given to the unfinished business of the previous sitting; after which bills and joint resolu-

tions on a second reading shall be taken in their order; and the House, in its afternoon session, will proceed to business as though there had been no adjournment of its morning session, excepting that original resolutions, and leave to introduce bills of Committees, be the first business in the afternoon session; and shall, on demand of the majority, proceed with the order of the day.

12. The Clerk shall make a list of all public bills and joint resolutions. He shall keep a separate calendar of private bills. No bills for granting, continuing, altering, amending, or renewing a charter for any corporation, other than a municipal corporation, shall be placed on the calendar of public bills. All bills, public and private, shall be numbered according to the time of their introduction into the House. They shall be taken up and considered in the order of time in which they were reported, or ordered to a third reading, as appears by the calendar; and the calendar shall be proceeded in until all the bills thereon are called up before the commencement of the calendar anew. The Clerk shall post in a conspicuous place in his office a list of all hearings to be held on bills.

13. All messages shall be sent from this House to the Senate by the Clerk.

OF DECORUM AND DEBATE.

14. When a member is about to speak in debate, or communicate any matter to the House, he shall rise from his seat and respectfully address himself to the Speaker, confining himself to the question under debate, and avoiding personality.

15. If any member in debate transgress the rules of the House, the Speaker shall, or any member may, call him to order, in which case the member so called to order shall immediately sit down, unless permitted to explain. The House shall, if appealed to, decide on the case, but without debate; if there be no appeal, the decision of the Chair shall be submitted to. If the decision be in favor of the member called to order, he shall be at liberty to proceed; if otherwise, he shall not be permitted to proceed without leave of the House, and if the case require it, he shall be liable to censure of the House.

16. If a member be called to order for words spoken in debate, the person calling him to order shall repeat the words excepted to, and they shall be taken down in writing at the Clerk's table; and no member shall be held to answer, or be subject to the censure of the House, for words spoken in debate, if any other member has spoken.

or other business has intervened after the words spoken, and before exception to them shall have been taken.

17. No member shall speak more than twice, or longer than five minutes each time, without leave of the House.

18. While the Speaker is putting any question, or addressing the House, none shall walk out of or across the hall; nor in such case, or when a member is speaking, shall anyone entertain private discourse; nor shall anyone, while a member is speaking, pass between him and the Chair.

19. No member shall vote on any question in the event of which he is particularly interested, nor in any case where he was not within the bar of the House when the question was put.

20. Every member who shall be in the House when the question is put shall give his vote, unless the House for special reasons shall excuse him. All motions to excuse a member from voting shall be made before the House divides, or before the call of the yeas and nays is commenced; any member requesting to be excused from voting may make a brief verbal statement of the reasons for such request, and the question shall then be taken without further debate.

21. Petitions, memorials and other papers addressed to the House shall be presented by the Speaker, or by a member in his place; a brief statement of the contents thereof shall be made by the introducer, and, if called upon, he shall declare that it does not, in his opinion, contain any indecent or reproachful language, or any expressions of disrespect to the House, or any committee of the same.

22. It shall be the duty of the Sergeant-at-Arms, at all times, not to allow any person to smoke in the Assembly chamber.

ON MOTIONS.

23. Every motion shall be reduced to writing, if the Speaker or any member desire it.

24. When a motion is made and seconded, it shall be stated by the Speaker, or being in writing, it shall be handed to the Chair and read aloud by the Clerk, when it shall be deemed to be in the possession of the House and open to debate; but it may be withdrawn at any time before a decision or amendment.

25. When a question is under debate no motion shall be received but—

1. To adjourn.

2. A call of the House.

3. To lay on the table.
4. For the previous question.
5. To postpone indefinitely.
6. To postpone to a day certain.
7. To go into a Committee of the Whole on the pending subject immediately.
8. To commit to a Committee of the Whole.
9. To commit to a Standing Committee.
10. To commit to a Select Committee.
11. To amend.

Which several motions shall have precedence in the order in which they are stated, and no motion to postpone to a day certain, to commit, or to postpone indefinitely, being decided, shall be again allowed on the same day, and at the same stage of the bill or proposition.

26. A motion to strike out the enacting clause of a bill or joint resolution shall have precedence of a motion to amend, and if carried shall be considered equivalent to its rejection.

27. A motion to adjourn shall be always in order, except when the House is voting, or while a member is addressing the House, or immediately after the question to adjourn has been negatived; that, and the motion to lay on the table, shall be decided without debate.

28. Any member may call for a division of the question, which shall be divided if it comprehends questions so distinct that one being taken away from the rest may stand entire for the decision of the House; a motion to strike out and insert shall be deemed indivisible; but a motion to strike out being lost, shall preclude neither amendment nor a motion to strike out and insert.

29. When any motion shall be made and seconded, the same shall, at the request of any two members, be entered on the Journal of the House.

30. When a motion has been once made and carried in the affirmative or negative, it shall be in order for any member who voted with the prevailing party to move for the reconsideration thereof, on the same day or on the next day of actual session of the House thereafter; all motions may be reconsidered, by a majority of the members present; but bills, to be reconsidered, must have the same majority that would be necessary to pass them; and such vote, on motion to reconsider, shall be by taking the yeas and nays.

31. When a blank is to be filled, the question shall first be taken on the largest sum, or greatest number, and remotest day.

32. The yeas and nays shall be entered on the Journal of the House, when moved for and seconded by five members, and in taking the yeas and nays the names of the members, including the Speaker, shall be called alphabetically.

33. The previous question shall be put in this form: "Shall the main question be now put?" It shall only be admitted when demanded by a majority of the members present, and its effect shall be, if decided affirmatively, to put an end to all debate, and bring the House to a direct vote upon amendments reported by a committee, if any, then upon pending amendments, and then upon the main question; if decided in the negative, to leave the main question and amendments if any, under debate for the residue of the sitting, unless sooner disposed of by taking the question, or in some other manner. All incidental questions of order arising after a motion is made for the previous question, and pending such motion, shall be decided, whether on appeal or otherwise, without debate.

34. After the Clerk has commenced calling the yeas and nays on any question, no motion shall be received until a decision shall have been announced by the Chair. *

If ordered to a third reading, the amendments shall be read, but these readings shall be on different days; the question shall then be, "Will the House of Assembly concur in the Senate amendments to Assembly bill No. —?" upon which question the votes shall be by yeas and nays. If concurred in by a majority of the whole House, the bill shall be re-printed, the amendments embodied therein, and the re-printed bill examined and reported upon by the Committee on Printed Bills, and read in open Assembly, to the end that it may be known to be correctly printed, and then signed and certified as other bills.

the House with such recommendation as they think fit. Such report shall be made promptly.

67. That hereafter any motion or resolution which will result in relieving a standing committee of a bill referred to it shall not be entertained unless twenty-four hours' notice shall be given the House of the introduction of such motion or resolution; provided, however, that on a written request of fifteen members, duly presented to the House, said request shall be read, and delivered forthwith by the Clerk to the chairman of the committee named therein; said committee shall, within twenty-four hours, report on the bill, resolution, motion or matter named in said request.

The said committee shall report on the day of presentation to the Governor, which time shall also be carefully entered on the Journal of each House.

STATE INSTITUTIONS.

THE STATE CAPITOL.

This edifice, a massive structure, erected at sundry times and various periods, is located on West State street, at the corner of Delaware street, running thence westerly along State street to the grounds of the late ex-Chancellor Green, and southerly to the Water Power. The location is a good one, and the building presents a very imposing appearance.

The seat of Government was fixed at Trenton by an act of the Legislature, approved November 25th, 1790. James Cooper, Thomas Lowery, James Ewing, Maskell Ewing, George Anderson, James Mott and Moore Furman were appointed commissioners to select, purchase or accept so much land as was needed, and to erect thereon suitable buildings for the use of the Legislature. They purchased the present site, containing about three and three-quarters acres—a frontage on Second street (now West State street) of 247 feet and 6 inches, and a depth from the front to low water line of the Delaware river of 666 feet—at a cost of £250 5s. The old State House was a plain, bare-looking, rough-cast building, and was erected at a cost of £3,992 3s. ½d. By an act of March 4th, 1795, a building was erected to serve as an office for the Secretary of State, and for the preservation of the public records, at a cost of £620 19s. 10d. Numerous improvements and repairs were made, and on March 3d, 1806, an act was passed appointing commissioners to make certain repairs to the State House, to provide and hang a suitable bell, &c. This was done, and the bell was used for informing the members of both houses, as well as the courts, of the hour of meeting. The bell was eventually discarded, and an American flag substituted, which waves from the building unto this day, when the Legislature is in session, and upon holidays and State occasions. In 1848, the State House was altered by the removal of the rough-casting, and changing the front to the style of the Mercer County Court House, placing neat porticoes over the front and rear entrances, and erecting two additional buildings adjoining the main one, as offices for the Clerks of the Chancery and Supreme Courts. The rotunda was also erected, and the grounds fenced, graded, laid out and shade trees planted, all at a cost of \$27,000. The commissioners under whose direction the work was completed, were Samuel R. Gummere, Samuel R. Hamilton and

Stacy A. Paxson. In 1863, '64 and '65, appropriations were made and expended in building additions for the State Library, Executive Chambers, &c. In 1871, Charles S. Olden, Thomas J. Stryker and Lewis Perrine were appointed commissioners to cause a suitable addition to be built—more commodious apartments for the Senate and Assembly, &c. The sum of \$50,000 was appropriated, and the buildings for the Legislature were ready for occupancy in time for the meeting of the Legislature in 1872. In 1872, \$120,000 was appropriated for completing the building, \$3,000 for fitting up the Executive Chamber, \$4,000 for fitting up the Chancery and Supreme Court rooms, and \$2,000 for fitting up the offices on the first floor of the east wing. In 1873, the sum of \$43,000 was appropriated for the improvement of the front of the building, completing unfinished repairs and improvements, and for fitting up the Library, &c. On March 18th, 1875, the sum of \$15,000 was appropriated for the purpose of putting a new three-story front to the building, and to fit up offices on the second floor for the Clerks of the Court of Chancery and Supreme Court, and for providing a suitable museum for geological specimens, and the battle-flags of New Jersey volunteer regiments, carried during the war of the Rebellion.

On March 21st, 1885, the front portion was destroyed by fire, and the Legislature appropriated \$50,000 for rebuilding, and, in 1886, an additional appropriation of \$225,000 was granted.

The new building was finished in 1889. It is of rectangular shape and of the Renaissance style of architecture, with a frontage of one hundred and sixty feet on State street, with a depth of sixty-seven feet, and three and a half stories high, with a rotunda thirty-nine feet across, which connects the new section of the Capitol with the original part. The rotunda is surmounted by a dome one hundred and forty-five feet high.

The building has about sixty feet more frontage than the former one, and approaches about ten feet nearer the street.

The walls are constructed of solid, fire-proof, brick masonry, faced with a light-colored stone from Indiana, known as Salem Oolitic, with foundations and trimmings of New Jersey free stone, from the Prallsville quarries, in Hunterdon county. The portico, door-head and trimmings about the door are of the same material. The portico, with balcony, is supported by massive pillars of polished granite and surmounted by the coat of arms of the State.

The apartments used for offices are very spacious, fitted throughout in the most approved modern style, and each department is supplied with one or more of the finest fire-proof vaults. The first and second stories are set aside for offices, and the entire third story is used for the State Library. This front portion, including the dome, was designed and constructed under the plans and supervision of L. H. Broome, architect, of Jersey City.

The old State Library apartments have been improved and extended, and are now used as offices for the Attorney-General, State Superintendent of Public Instruction and Commissioner of Banking and Insurance. A new story was added, which is used for the Geological Museum and State offices.

In 1891, a new Assembly Chamber was erected. The old one was too small and poorly ventilated, and besides, there was a lack of suitable committee rooms. The Legislature of 1891 passed a Joint Resolution, which was approved on March 20th, authorizing the Governor "to provide a suitable chamber and committee rooms for the use of the General Assembly of this State," &c., and also, "to make such additions and alterations as will afford the necessary accommodations for the Supreme Court and Court of Errors and Appeals, or for other State offices, and sufficient money is hereby appropriated for that purpose, to be paid by the Treasurer of this State on the warrant of the Comptroller, after approval by the Governor."

The new chamber was built by James W. Lanning, of Trenton, from plans prepared by James Moylan, of Jersey City, and under the superintendency of Bernard J. Ford of Newark. It covers the site of the former chamber, and extends beyond it to Delaware street on the east and to the water power on the south. It has a frontage on Delaware street of 120 feet and a depth of 75 feet. The exterior finish and design of the building are similar to the adjoining portion of the Capitol. The foundation is of brown stone, from the Stockton quarries, and the trimmings of light Indiana stone. The interior is finished in Trenton tile, quartered oak and Italian statuary marble. It is a fire-proof building throughout, and is specially ventilated. The committee rooms are ample and convenient, and the interior design arrangement and finish make it a model legislative chamber. It cost the State \$140,500. The cost of the steam heating and ventilating systems was about \$25,000.

The other new addition to the Capitol provides a consul-

tation room for the Judges of the Supreme Court and the Court of Errors and Appeals and a private room for the Governor, a room for the Museum of the Geological Survey, and other offices, and cost \$34,500.

An electric light apparatus was also placed in the Capitol, which cost \$23,000. Every department in the building is now lighted by electricity.

Two Otis elevators have been placed in the building, which gives easy access to all the upper floors.

In 1900 the Legislature appropriated \$96,000 for additions and alterations to the Capitol, which included the cost of an electric light plant.

A new Senate Chamber was erected in 1903, and was ready for occupancy in 1904, at a cost of about \$182,000. In 1904 about \$60,000 was expended for other improvements in the Capitol.

Another addition was made to the Capitol in 1907 at a cost of about \$100,000. It is a massive structure of a classical style of architecture and is finished in stucco to match the rest of the Capitol. It contains four stories above a deep basement. The construction is fire-proof, consisting of solid brick walls, steel beams and columns and concrete floors. The exterior is attractive with its classic lines and Indiana limestone trimmings. The structure was designed and all the plans drawn by George E. Poole, State Architect.

In 1911 the Legislature made an appropriation of \$60,000 for the extension of the west wing of the front part of the building, and in 1912 \$70,000 was appropriated for the extension of the east wing.

THE STATE LIBRARY.

This valuable collection of books is located on the third floor of the State Capitol. The old saying, "Great oaks from little acorns grow," most appropriately applies to this institution.

The first library of the State was a case ordered to be procured by Maskell Ewing, Clerk of the House of Assembly, for the keeping and preservation of such books as belonged to the Legislature. It was ordered by a resolution passed March 18th, 1796. This was the nucleus of the present extensive library. On February 18th, 1804, William Coxe, of Burlington; Ezra Darby, of Essex, and John A. Scudder, of Monmouth, were appointed a Committee on Rules to make a catalogue; they reported that there were 168 volumes belonging to the State, and presented a code of seven rules, which was adopted. On

February 10th, 1813, an act (the first one) was passed, entitled "An act concerning the State Library." Up to 1822 it appears that the Clerk of the House had charge of the books, as Librarian, and, on November 16th, 1822, an act was passed for the appointment of a State Librarian, annually, by joint meeting. In 1846, on April 10th, an act was passed making the term of office three years. The Law Library at that time belonged to the members of the Law Library Association. The only persons allowed the use of the Library were members of the Association, the Chancellor, and the judges of the several courts. Stacy G. Potts was Treasurer and Librarian of the Association. The Law Library was kept in the Supreme Court room until 1837, when the Legislature authorized the State Librarian to fit up a room adjoining the Library for the care and reception of the books and papers belonging to the State Library. Thus the two Libraries were consolidated. On March 13th, 1872, \$5,000 per year for three years was appropriated for the Library by the Legislature, and by the act of March 15th, 1876, the sum of \$2,500 was appropriated for finishing and refurnishing the Library room. In 1890, the Library was removed to the third story of the new part of the Capitol.

In 1904 the Legislature made a special appropriation of \$15,000 for the installation of steel stacks, and the shelf-space was doubled. There is room now for more than 125,000 books and pamphlets. About the same time the decimal classification system was introduced and the work of making a modern card catalogue begun, which was practically finished in 1905.

THE STATE ARSENAL.

The building now used as the State Arsenal was formerly the old State Prison. It is situate on Second street, in the Sixth Ward of the city of Trenton, and has on its front the following inscription:

Labor, Silence, Penitence.

The Penitentiary House.

Erected by Legislative Authority.

Richard Howell, Governor.

In the XXII. Year of American

Independence, MDCCXCVII.

That Those Who Are Feared For Their

Crimes May Learn to Fear the Laws

And be Useful.

Hic Labor, Hoc Opus.

In the messages of Governors P. D. Vroom and S. L. Southard, recommending the erection of the new prison, it was proposed that the old one be converted into an Arsenal for the safe keeping of the arms and military property of the State, which, previous to that time, had been kept in the old State Bank, corner of Warren and Bank streets, with accoutrements and camp and garrison equipage at the State House. After the removal of the State convicts from the old prison, permission was given to the county of Mercer to occupy it as a jail until its jail, then in course of completion, was finished, and when it was again vacated it was converted into an arsenal.

Among the stores, &c., at the Arsenal are one bronze gun, French, of the date of 1758; two bronze guns, English, four-pounders, and two iron six-pounders. There is also one gun captured at the battle of Trenton, December 26th, 1776, and two guns captured at Yorktown, October 19th, 1781. There are also a large quantity of fire-arms, ammunition, ordnance, tents, clothing, blankets, &c.

STATE HOSPITAL.

Trenton.

This institution is located on the right bank of the Delaware River, about two miles northwest of the City Hall. The buildings are constructed of reddish sandstone, obtained from quarries near the hospital, and are located on an elevation of about seventy-five feet above the river. The front of the Main, or Administration Building, is ornamented by a handsome porch of Ionic architecture, designed by the celebrated Notman, from which may be obtained one of the finest landscape views in the State.

In 1844, after repeated and unsuccessful attempts to cause action to be taken by the Legislature for the building of a State institution for the special care and treatment of the insane, a commission was appointed, chiefly through the earnest efforts of Dr. Lyndon A. Smith, of Essex, and Dr. Lewis Condict, of Morris, and the eminent philanthropist, Miss D. L. Dix, to select a site. An appropriation of \$35,000 was made to purchase the land and to commence the erection of the building. The present site was selected by the commissioners from among many that were offered in various sections of the State, because of

the large spring of excellent water found on the place. This spring was developed, and furnished a daily supply of about one-half million of gallons of pure water for many years. In the severe drought of 1830 the supply was greatly diminished, falling off nearly two hundred and fifty thousand gallons. In 1907 the city sewer, running about 200 feet from the spring, burst or overflowed, and this caused contamination of the water supply, resulting in a typhoid epidemic, so that it was necessary to discontinue the use of the spring. At present the hospital is supplied with water by six artesian wells, one of which gives 150 gallons of water per minute. The spring has been filled up, and thus an important landmark destroyed.

Work was commenced on the main building in November of 1845, and the hospital was opened for the reception of patients on the 15th day of May, 1848. Numerous additions have been made from time to time to the building, increasing its capacity.

In 1887 the Legislature passed an act appropriating \$100,000 for providing additional accommodations. The new building is a handsome structure of red sandstone, and similar to that used in the main building. This is five hundred feet long, three stories in height, and capable of accommodating three hundred patients, one hundred and fifty of each. The building is designed to accommodate the chronic incurable class, and was a great relief from the overcrowded state that existed in the main building prior to its completion. The building was completed within the appropriation, and opened for the reception of patients in the month of October, 1889.

Much has been done for the comfort and pleasure of the patients. A greenhouse has been erected for the purpose of furnishing plants and flowers for the patients' corridors, handsome pictures adorn the walls, and everything about the hospital presents a comfortable and homelike appearance.

The institution possesses a library, one of the largest, if not the largest, in this country, connected with a hospital for the insane. The books are accessible to all members of the household. They have been freely used, and do much to relieve the monotony of many an hour of hospital life. The library now consists of about 4,000 volumes, and is the result of the bequest of a former nurse (Anne Robinson) who, by

will, bequeathed her earnings for several years as a nurse and attendant in this hospital. She made the bequest, as she herself expressed it when making her will, for the purpose of purchasing books to be used for the pleasure and benefit of those to whom she had, for so many years, endeavored to minister.

During the year 1898 a handsome amusement room, capable of seating about four hundred, was finished; also, a large and commodious chapel, in which religious exercises are held every Sunday, when various clergymen, without regard to denominational preference, officiate. The new chapel is capable of seating about five hundred patients. In 1904-1905 an appropriation of \$250,000 was made for the erection of two additional wings to the annex building, which will accommodate 400 more patients. In 1905 the Legislature appropriated \$12,500 for the construction of fire escapes.

A few years ago a modern laboratory building was erected, and at the present time is fully equipped for scientific work.

In 1907 the new wings, spoken of above, were opened for the reception of patients, so that now the hospital is not overcrowded.

In 1908 the Legislature appropriated \$111,000 for extraordinary improvements, which included installation of modern plumbing throughout the buildings, also tiling for toilet rooms, water sections, etc.

Two buildings for tuberculosis patients, male and female, have been erected, and will accommodate twenty-five, each known as the "open air" ward.

Since January 1st, 1908, there has been no mechanical restraint of any kind used in the hospital. All restraint apparatus, chairs, straight jackets, straps, etc., have been removed from the hospital building, and are stored away where no one can get at them.

During the year 1909 the plumbing and tiling of the old building was completed, and the sanitary arrangements for the hospital have been considered by those competent to judge, to be the best of any public institution of this character.

In both the male and female departments a hydrotherapeutic apparatus has been installed for giving the continuous bath treatment. This apparatus was made especially for the hospital, and has given satisfactory service in the treatment of acutely excited cases.

The Legislature of 1911 appropriated \$103,000 for extraordinary improvements. Two farms in the neighborhood of Trenton Junction have been purchased, which will add 250 acres of farm land to the hospital. A new laundry has been erected and equipped with modern machinery, at a cost of \$30,000.

The Legislature appropriated \$2,800 for research work, which enables the hospital to employ two trained field workers who go out in the community and look up facts regarding the patients' heredity and personal history, which gives valuable information to the medical history. They also engage in "after care" work, i. e., in visiting discharged patients at certain intervals, investigating their condition, and reporting to the hospital any unusual conditions which have any bearing on the recurrence of mental disease. During the years 1910 and 1911 \$5,000 has been spent for furniture for the wards. The Legislature of 1912 appropriated \$165,000 for new buildings, including one for the criminal insane.

STATE HOSPITAL.

Morris Plains (P. O. Greystone Park).

Further provision for the accommodation of the insane being made necessary by the overcrowded condition of the State Hospital at Trenton, the Legislature of 1871 appointed a commission to select a site and build a hospital in the northern part of the State.

At a cost of \$78,732.36 a tract of 408 acres of land, beautifully situated in the hills of Morris County, was purchased and work on the hospital buildings begun.

Additional tracts of land have since been purchased at a cost of \$32,318.00, making a total of 852 acres, at a total cost of \$111,050. The original building, now known as the "Main Building," was erected, at a cost of \$2,511,622. The "Dormitory Building" and a new reservoir, made necessary by its construction, cost, when completed, about \$650,000; a new laundry building, \$18,200; the nurses' cottage, \$20,000, and in 1907 the annual appraisalment placed the personal property of the hospital at \$294,709, thus making the total cost of the entire plant approximately \$3,605,581.

The location is ideal for an institution caring for

the mentally afflicted, and is unsurpassed in this particular by any similar institution in the United States. The buildings command a magnificent view of the surrounding country, and the air is cool and balmy in Summer and crisp and stimulating in Winter.

The main building, opened in 1876, is four stories in height, 1,243 feet in length, 542 in depth, and has ten acres of floor space. It contains the executive offices, reception rooms, medical library, chapel, amusement hall and forty wards, which, when crowded to their full capacity, will accommodate 1,200 patients.

In 1901 the dormitory building was completed. It is situated 1,200 feet in the rear of the main building, accommodates 600 patients, and is constructed on the day room and dormitory plan. On the fourth floor of the building are well-equipped pathological and chemical laboratories, five splendidly-lighted rooms on the top floor of the northeast tower being devoted to this work. The laboratories have been well equipped with many of the latest and best instruments for the prosecution of scientific, clinical and research work, and have proved to be a highly important adjunct to the purely psychiatric work of the hospital.

A cottage for nurses was built in 1906. This is a three-story brick building, trimmed with sandstone, and is situated in front and to the south of the main group of buildings. It is within easy access of the female wards, and affords sleeping quarters for forty female nurses, who formerly, after working daily fifteen hours with the insane, were compelled to spend their nights in the wards, in close proximity to noisy and disturbed patients. In addition to furnishing accommodation for the night, the cottage has a reception room and library, where the nurses may spend their time when off duty.

In order to give the hospital a better mail service, the United States government, on March 23, 1908, established a new post office in the main building of the hospital, and named it Greystone Park. The mail matter of the institution was formerly handled at Morris Plains post office, which is one and one-half miles from the building.

The Legislature of 1911 appropriated \$15,000 for the erection of a new fire house. This fire house provides stabling quarters for two horses and sleeping room for

twenty male employes who are always to be members of the fire department.

The same Legislature appropriated \$40,000 for the erection of a male nurses' home. This building accommodates seventy-six men nurses.

A cold storage plant has been added to the institution which produces five tons of ice per day and also provides a room for the storage of hospital food supplies.

The Legislature of 1911 made an appropriation of \$15,000 for a dynamo and building, and there was also appropriated \$10,000 for a building for the segregation of tubercular patients. The same Legislature also appropriated \$8,000 for screening the windows of the main building and dormitory building.

The Legislature of 1912 appropriated \$69,000 for new buildings and alterations.

A Training School for Nurses was established in 1894 and it has proved to be of great advantage to the hospital in the humane care and treatment of the insane. A graded three-years' course is given to the nurses and consists of lectures and practical demonstrations given by the medical staff in anatomy, physiology, materia medica and therapeutics, chemistry and toxicology, obstetrics and gynecology, genito-urinary diseases, practice of medicine, minor surgery, practical bedside nursing and bandaging. The course is compulsory upon all who are employed as attendants, and since the establishment of the school, 192 persons have been granted diplomas.

Further provision for the scientific treatment of patients has been made by the equipment of rooms, both in the male and in the female departments, with complete hydrotherapeutic apparatus and by the installation of electrotherapeutic appliances, and a powerful static machine in a room in the main building, convenient to both male and female departments.

A room has also been set apart and fully equipped with instruments and appliances for the examination and treatment of patients suffering from diseased conditions of the eye, ear, nose and throat.

The medical library contains over 1,300 volumes of carefully-selected text books and reference works on medical and other scientific subjects, together with well-bound volumes of the annual reports of every hos-

pital for the insane in the United States, Canada, South American States and many of the countries in Europe.

Among the many improvements added in recent years is a new system of keeping case records. The complete record of each patient from the time he enters the hospital until he is discharged is kept in a separate envelope, filed vertically in steel cabinets especially constructed for the purpose. The files are thoroughly cross-indexed, which permits of needful information being rapidly and easily obtained in any given case.

Additional protection from fire has been provided by equipping the hospital with the Kirker-Bender type of fire escape.

Fire drills are held at regular intervals so that the patients may become familiar with the location of the fire escapes and accustom themselves to their use so as to enable them in the event of fire to go through this means out of danger in an orderly and expeditious manner.

The hospital has equipped Dental Rooms with the latest and most modern appliances, thus enabling the Visiting Dentist to do scientific work for the patients needing dental attention.

STATE NORMAL AND MODEL SCHOOLS

at Trenton.

These schools are the property of the State, and are located at the junction of Perry street and Clinton avenue, Trenton. There are two buildings, the school building on the west side of Clinton avenue, and the boarding halls and dormitories, situated on the east side of the avenue. These schools were established in 1855 by an act of the Legislature. The purpose of the Normal School was defined to be "the training and education of its pupils in such branches of knowledge, and such methods of teaching and governing, as will qualify them for teachers of our common schools." The Model School was designed to be a place where "the pupils of the Normal School shall have opportunity to observe and practice the modes of instruction and discipline inculcated in the Normal School.

The Normal School has four different courses of study, as follows: First, a two years' general course for graduates of four years' high school courses; second, a two years' kindergarten course for graduates of four years' high school courses; third, a two years' domestic science course for graduates of four years' high school courses; fourth, a four years' high school teachers' course, equivalent to a teachers' college course. Also special music courses in voice training, piano and violin.

The Model School begins with the kindergarten and includes a full secondary or high school curriculum. It offers three courses: the classical, Latin scientific and English.

The buildings are equipped with laboratories, gymnasium, and the modern appliances necessary to good work.

The following figures show the first cost to the State and the present valuation of the Normal School property. The first cost to the State has been supplemented from time to time by the contributions of private individuals, and by balances from the Boarding Hall receipts after meeting the annual expenses of the Hall. It includes also an industrial arts course in co-operation with the Trenton School of Industrial Arts.

THE NEW JERSEY STATE NORMAL SCHOOL
at Montclair, Essex County.

The increasing demand for professionally trained teachers, and the inability of the State Normal School, at Trenton, to meet it, led to the passage of a resolution by the Legislature of 1902 directing the State Board of Education to investigate as to the need of increased normal school accommodations and how best to provide them, should the board find the present accommodations inadequate.

In its study of the question the board discovered that there were 7,561 teachers in the public schools of the State, and that of this number 2,224 were graduates of normal schools, 457 were college graduates, and 1,663 graduates of city training schools, leaving 3,217 teachers, or nearly one-half of the entire number, who had not had any special training. Of the graduates of normal schools employed, nearly forty per cent. came from other States, notwithstanding the fact that the New Jersey State Normal School, at Trenton, was working to its full capacity.

In its report to the Legislature in 1903 the board recommended that a normal school be erected in the northern part of the State. In 1904 the Legislature appropriated \$25,000 for the purchase of a site. The board, after inspecting numerous sites, finally purchased a plot in the northern part of Montclair, in Essex County, at a cost of \$25,000. The plot contains twenty-five acres and is 400 feet above sea level, giving an uninterrupted view of Newark and surrounding towns and of the bridges and skyscrapers of New York City. The plot is large enough to accommodate the school building and dormitories, should it be found necessary in the future to provide them, and also to give a large campus and sufficient ground for illustrating methods of teaching agriculture, which will in the near future be as important a subject in the curriculum of a well organized normal school as illustrating the methods of teaching chemistry or literature is at present. Within a radius of ten miles from the site selected there is a population of more than one million.

In 1906 the Legislature appropriated \$275,000 for the erection and furnishing of the building. The plans were prepared by State Architect George E. Poole and Assistant Architect Francis H. Bent, of the Department of Charities and Corrections. The mission style of architecture was adopted, and the material is brick covered with pure white stucco, the roof being red tile. The building is 334 feet long and 133 feet deep, the centre and wings projecting. In front is an esplanade 260 feet long and 44 feet wide, protected by a concrete wall from which steps descend to the lawn.

In the basement are the manual training and domestic science rooms, four rooms for observation

classes, locker and dressing rooms, showers, recreation and lunch rooms.

On the main floor are the board room, the principal's offices, a library 32x60 feet, the study hall and gymnasium, each 57x76 feet, two large lecture rooms and eight class rooms. The study hall and gymnasium have ceilings twenty-five feet high, giving ample space for gallery and running track, respectively.

On the second floor is the drawing room, 32x60 feet, with high ceiling and north light, three lecture rooms, large laboratories for chemistry, physics, botany and zoology, and dark rooms for photography. Teachers' rooms are provided on each floor.

The finish is in hard pine, except the study hall, which is in white and gold. The study hall will also be used as the auditorium. The walls of the laboratories are of white tile and the floors of cement. The walls of the gymnasium are of cream-colored brick.

The heating and ventilating plant is in a separate structure, located some distance from the main building. The cost of the buildings, exclusive of furniture and grading, will be less than \$250,000.

The school was formally opened on Monday, September 28, 1908. Addresses were made by Governor Fort, President Hays, of the State Board of Education, Edward Russ, chairman of the Building Committee, and others.

The regular sessions of the school began September 15, 1908, with an attendance of 187 pupils.

A class of 45 teachers was graduated in June, 1910, and 145 teachers were graduated in June, 1911. The membership of the school for the year ending June 30, 1911, was 443. The demand for graduates of the school far exceeds the supply, and all graduates are now employed in teaching.

The Principal is Dr. Charles S. Chapin, formerly Principal of the Rhode Island State Normal School.

The school may be reached in three ways:

1. By Erie Railroad—Greenwood Lake Division. The Montclair Heights station adjoins the grounds of the Normal School.

2. By D. L. and W. Railroad to Montclair station, thence by Valley Road trolley to the grounds.

3. By Bloomfield Avenue trolley with transfer at Valley Road to Valley Road trolley.

Passengers by the Pennsylvania Railroad to Newark can take Bloomfield Avenue trolley at Newark station.

Passengers by the Central Railroad of New Jersey to Newark can take Bloomfield Avenue trolley at corner of Market and Broad Streets, Newark.

THE NEW JERSEY STATE NORMAL SCHOOL

at Newark.

The new State School building is centrally located between Broad street and Belleville avenue, at the intersection of Fourth avenue, and occupies, including its spacious grounds, an entire city block. The architecture of the building is dignified as well as picturesque and is enhanced by the sunken garden, masses of bloom and hedges. The interior has been greatly admired for the beauty of its color scheme, its fine appointments and educational features. The building is equipped with an auditorium, gymnasium, laboratories, manual training shops, sewing rooms, art rooms and spacious, well-ventilated class rooms for normal work. Special features are the demonstration rooms with raised seats, lecture rooms, conference rooms, a fine library, study halls and a splendidly equipped kitchen and dining room. The building also has a modern system of heating, lighting and ventilating and excellent sanitary conditions.

This new building opened its doors under State control September 16th, 1913, with an enrollment of 450 students and a waiting list. It may be of interest to note that the school is so centrally located that only two students requested boarding places in the city of Newark. The trolley and railroad facilities are such that they can readily come and return to their homes. A dozen prominent high schools are within forty minutes of the school.

A large practice school is connected with the Normal where students are trained under actual school conditions and the aim is to graduate an efficient corps of teachers for the public schools of the State.

The Principal of the new State School is W. Spader Willis, who for fourteen years was Principal of the City Normal School at Newark.

THE STATE HOME FOR BOYS.

"The New Jersey State Reform School" was established by act of the Legislature approved April 6th, 1865. A farm of 490 acres was purchased for the purpose near Jamesburg, Middlesex county.

The first boy was received July 6th, 1867. Its first Superintendent was Rev. Luther H. Sheldon, who was in office from April 10th, 1867, till April 1st, 1874, and was succeeded by James H. Eastman, who was Superintendent from April 1st, 1874, till September 15th, 1884. Upon his withdrawal Ira Otterson was made acting Superintendent, and on December 10th, 1884, he was elected Superintendent. In 1902 Mr. Otterson was succeeded by John Wildes who, March 1, 1904, gave way to John C. Kalleen. In 1900 the name of The Reform School was changed to the State Home for Boys.

Since founding the school, beside the Administration building, there have been erected on the campus eight family buildings (two of them double buildings), capable of accommodating fifty boys each, a chapel, hospital, store and cook house, industrial building, electric light, heat and power, generating station and farm buildings, conservatory, up-to-date cow barn, piggery, all of brick, many of the buildings constructed with bricks manufactured by the boys on the place.

Besides domestic and farm labor, all boys are instructed in the rudiments of an English school education, and many receive instruction in shorthand and typewriting and in the different mechanical branches and band music.

In 1900 there was erected by boys' labor, under regular instructors, a building 40 by 100 feet, two stories high, in which are established schools for trade teaching. In 1910, in this building, a complete outfit of machinery consisting of a planer, mortiser, universal and band saw, and others necessary to make it complete was supplied. While in the past, so far as the accommodations would permit, a number of boys have received instruction in mechanical trades, and with the accommodations furnished in the new building, a greater number of boys receive a more thorough knowledge in lines of skilled handicraft, which will the better prepare them to become good citizens.

During 1910 the cow and dairy barn have been remodeled and rebuilt, and the Legislature of 1910 appropriated \$40,000 with which to erect a central school building. The Legislature of 1912 appropriated \$40,000 for the erection of a double cottage.

STATE HOME FOR GIRLS.

This institution is located on the line of the Trenton Branch of the Philadelphia and Reading Railroad, in the City of Trenton, near the Trenton State Hospital, and is located on a farm of about 79 acres of land. A substantial building was erected at a cost of \$23,334, and other improvements since made bring the value of the place, with furniture, &c., up to \$186,622. The value of the land is \$16,700. Previous to the erection of the new building, the school was at "Pine Grove," in the Sixth Ward of the city of Trenton. This place had been leased so as to afford room for persons sentenced under the act of April 4th, 1871, and a subsequent act. The Legislature of 1900 appropriated \$30,000 for the erection of an additional building. In 1900 and 1901 about \$31,000 was spent for improvements and the Legislature of 1905 appropriated \$36,000 for the erection of a new cottage and about \$9,000 for various other improvements. On February 11th, 1910, a new administration building, named the "Fort Cottage," was formally opened. It is the counterpart of Washington's headquarters at Morristown, N. J., and had served as New Jersey headquarters at the Jamestown, Virginia, Exposition. It is most elaborately furnished with everything suggestive of the colonial period. A new cottage costing \$25,000 was erected in 1911 and 1912 to house twenty-five little girls. The Legislature of 1912 appropriated \$16,700 for the erection of an infirmary and barn.

The institution is for girls between the ages of ten and nineteen years who may be committed to it by the courts.

THE STATE PRISON.

The New Jersey State Prison, situated on the block enclosed by Federal, Third, Cass and Second streets, in the city of Trenton, is one of the finest institutions of its kind in the country. Its erection was authorized by an act of the Legislature passed February 13th, 1832, and it was completed in the year 1836, having 150 cells, at a cost of \$179,657.11. It was built of red sand-stone, from the

Ewing quarries, and the style of its architecture is Egyptian, having four Egyptian columns in front of the main entrance, on Third street. It consists of a main building, used as a residence for the Keeper and as reception rooms and offices. From time to time the prison has been enlarged, and although there is not sufficient room to afford separate confinement for each prisoner, as required by law, the provisions of the act are carried out as far as possible. The rules and regulations now in force have brought the internal affairs of the institution, as to cleanliness, discipline, victualing, &c., to a much higher standard than was ever before reached, and a visit thereto will convince the visitor that the management is as perfect as can be.

Previous to the year 1798 there was no State Prison, and prisoners were confined in the county jails. On March 1st, 1797, Jonathan Dcane was appointed by an act of the Legislature as an agent to purchase a lot of land from Peter Hunt, situate at Lamberton, containing six and a half acres, and to erect suitable buildings thereon. This was done at an expense of £9,842 0s. 3d., and what is now the State Arsenal, at Second and Cass streets, is the result. Solitary confinement was not practiced previous to 1836, in which year the old prison was vacated and the present one occupied.

On March 4th, 1847, \$5,000 was appropriated to build an additional wing to the original building. On March 25th, 1852, \$15,000 was granted for the erection of a new wing for hospital purposes. On March 22d, 1860, the sum of \$17,000 was voted for the purpose of building an additional wing for cells, and on February 16th, 1861, a further sum of \$2,243.01 was appropriated to complete the same. On April 16th, 1868, \$6,000 was appropriated for the building of an additional wing to provide room for female convicts. An act passed April 2d, 1869, provided for the appointment of commissioners to extend the grounds of the prison to the wall of the State Arsenal, to build an additional wing and workshops, and made an appropriation of \$50,000 for that purpose, and in the same month \$9,734 was appropriated for the purpose of completing the wing of the female department. On April 4th, 1871, the sum of \$75,000 was appropriated for the purpose of completing the new or east wing, and on April 4th, 1872, a further sum of \$28,700 was appropriated for the completion of the same. March 3d, 1874, \$12,000 was voted for the construction of gas works for the supply of illuminating gas

for the prison. On March 8th, 1877, the sum of \$100,000 was appropriated for the enlargement of the prison and the purchase of a burial ground for deceased convicts. The north wing was remodeled out of this last appropriation and a burial ground purchased. The Legislature of 1895 appropriated \$150,000 for the enlargement and improvement of the prison. The Legislature of 1899 appropriated \$14,000 for alterations in the women's wing of the prison. In 1905 \$250,000 was appropriated for the erection of a new wing, and it was finished in 1907. The addition, which is at the northeast corner of the institution, is one of the most complete in the United States. There are five tiers, each having seventy cells. The interior is wholly of steel and concrete. The cells are separated from the outer walls by a passageway for the keepers and the entire section of each tier is completely enclosed in a cage of steel. Thirty-five cells are controlled by a combination locking device, although any one cell door or a series of doors can be thrown open by a lever system from the end of the corridor where the locking device is located. Between the cell sections there is a narrow utility court from which the ventilation is controlled and where the sanitary parts can be reached without any necessity for going into the cells. Each cell has a steel cot, porcelain washstand and sanitary arrangement and is lighted by electricity. Special attention has been given to ventilation. A death house was also built on the prison grounds in 1907 to comply with the law regarding the electrocution of persons condemned to death.

THE NEW JERSEY HOME FOR DISABLED SOLDIERS.

This institution is located in Kearny, Hudson county. It originated in the mind of Governor Marcus L. Ward just before the close of the Civil War. His petition to the Legislatures of 1863-64 resulted in the passage of an act on April 12th, 1864, appointing himself, ex-Governors Daniel Haines, William A. Newell and Charles S. Olden, and Edwin A. Stevens and Rynear H. Veghte as commissioners to examine into and report on the subject. On February 1, 1865, they made their report to Governor Parker and the Legislature appropriated \$50,000 for the desired purpose. Grounds were purchased in the city of Newark and in March, 1866, the same commissioners were

appointed managers of the Home. The board appointed Colonel A. N. Dougherty, Commandant; Rev. Samuel T. Moore, Superintendent and Chaplain, and Dr. A. M. Mills, Surgeon, of the Home. It was opened for reception on July 4th, 1866. For twenty-two years the Home remained in Newark, when a new site was selected in Kearny. This comprises about sixteen acres and \$225,000 was appropriated for the buildings, furnishings, &c. On October 4th, 1888, the old home was vacated and the new home occupied. The New Jersey Home is the parent of similar institutions throughout the country. In order to gain admission to the Home the applicant must have served in the army, navy or marine service and been honorably discharged therefrom. He must have lived in the State for at least two years next preceding date of application, or have served in a New Jersey organization, and must be unable to earn a living for himself by manual labor. Since 1888 various additions have been made.

NEW JERSEY HOME FOR DISABLED SOLDIERS, SAILORS OR MARINES AND THEIR WIVES.

Vineland.

This Home was organized in 1898, the sum of \$5,000 having been appropriated for the purpose. A plot of ground, comprising 20 acres, and a building containing about 75 rooms and basement, situated in the town of Vineland, were purchased for a Home, and in 1899 an additional appropriation of \$21,500 was made to pay for the property. In the same year the sum of \$20,000 was appropriated for altering, repairing and furnishing the buildings. In 1900 a special appropriation of \$13,000 was made for new floors, porches, laundry machinery, engine and boiler and furniture. The Home was opened in December, 1899, for the admission of inmates and the first were admitted January 2d, 1900. In 1901 the sum of \$7,700 was appropriated for an elevator, alterations and appliances, making the cost of building and land \$67,200. In 1903 nine acres of additional land was purchased at a cost of \$2,000 and the same year an act was passed by the Legislature providing for the care and maintenance of widows of veterans, and the sum of \$28,000 was appropriated for the construction and furnishing of buildings necessary to carry out the provisions of the act. An additional sum of \$2,500 was appropriated for extra work and the building was

completed and ready for occupancy in July, 1904. Since then two new wings, each eighty feet long and containing some 120 rooms, have been added, and a separate boiler house in the rear of the main buildings erected. A new heating and lighting plant has been installed, and other marked improvements for the care and comforts of the inmates completed. In 1912 the Legislature appropriated \$30,000 for a new hospital.

SCHOOL FOR THE DEAF.

This institution, which is located at Trenton, is a part of the public school system of the State, and is open to deaf residents of the State between the ages of six and twenty-one years. The pupils are instructed in the branches of common-school education, and are also trained in some handicraft. Speech is taught to all who can acquire it, and with such success that in some classes it becomes the principal means of communication.

The industrial department is larger and better equipped than in most schools of this kind. From the printing office is issued monthly a paper, the *Silent Worker*, which, in point of mechanical execution and of quality of contents, ranks as the best issued from any institution in the country. All the work on this paper is performed by pupils of the school.

The wood-working department, under the charge of a graduate of a technical school of high rank, has a course in which theory and practice are united in an unusual degree.

A course of kindergarten work, especially adapted to the deaf child, has been worked out in the school, and has been followed by some of the best schools of the kind in this country.

A building for hospital purposes, designed in accordance with the best modern practice and ample to meet any possible need, was opened in 1899.

The attendance of pupils has risen from 125 in June, 1896, until at the present time it is about 170.

The school possesses a well chosen library, which at present contains about 4,000 volumes, and is rapidly growing.

HOME FOR THE CARE AND TRAINING OF FEEBLE-MINDED WOMEN.

Vineland.

This institution was established by virtue of the act of March 27th, 1888, the late S. Olin Garrison, who drafted the original law, being its first superintendent. On November 7th, of the same year, he was succeeded by Mary J. Dunlap, M.D., and then by Dr. Madeleine A. Hallowell. Upon organization of the first board of managers, the late Hon. Alexander G. Catell, of Camden county, was chosen President, a place he acceptably filled until his death. He was succeeded by the Hon. Benjamin F. Lee, of Mercer county, Clerk of the Supreme Court, who occupied the position until his death in 1909. Mrs. Emily E. H. Williamson, of Union county, was secretary of the board from its organization until her death in 1909. The first treasurer was the Hon. Belmont Perry, of Gloucester county, he being succeeded by ex-Senator Philip P. Baker, of Cumberland county; the late Senator Barton F. Thorn, of Burlington county, and George B. Thorn, Esq., of Burlington county, the present incumbent. Harry H. Pond was elected President in 1909.

As its official title suggests, this institution has for its object the care and training of feeble minded women. Its location in a peculiarly healthful and fertile portion of the State, the plan and scope of the buildings, as well as their equipment and the employment of modern administrative methods, make the Home a subject for favorable comparison with any similar institution in the country. The property consists of about 50 acres.

The most conspicuous building of the Home is that devoted to purposes of administration and instruction, including dormitories and a gymnasium. There is also a laundry, a power-house, with heating apparatus, and pump for raising the sewage of the home into the Vineland system. Fire escapes and a water tower give protection to the State's wards. All the buildings are lighted with gas or electricity.

In 1912 the Legislature appropriated \$60,000 for a new dormitory, &c.

TRAINING SCHOOL FOR FEEBLE-MINDED CHILDREN.

Vineland.

This public institution is an outgrowth of a private one, which Prof. S. Olin Garrison established in Millville, Cumberland county, on September 1st, 1887. It was opened at Vineland, on March 1st, 1888, with an enrollment of ten pupils. Adjacent properties were soon acquired and a handsome building, costing about \$18,000, was erected in 1890-91. There are fourteen cottages, besides a hospital, large barns, shops and manual training rooms, located on a farm of 260 acres. The school has a fine assembly hall, seating over 600, and also containing seven school rooms, drill room and a gymnasium. The Department of Research has a well equipped laboratory, where studies as to the cause and prevention of feeble-mindedness are carried on.

The plan and scope of training and education by the school, require fourteen teachers in English, Kindergarten, Music, Physical Culture and Manual Trades departments, thereby indicating the special and comprehensive fields of instruction. There is also a custodial department for the idiotic.

The property is worth over \$250,000, real and personal, with a debt of only \$21,000. Besides very good property acquisitions at low cost, at least \$150,000 have been donated to the school since its organization, to aid in the current expenses, in improvements and new buildings.

STATE VILLAGE FOR EPILEPTICS.

(Henry M. Weeks Hospital.)

Skillman, Somerset County.

This village is located in Montgomery township, Somerset county, at Skillman Station, on the line of the Philadelphia and Reading Railroad. The location is one of the most beautiful and healthful in the State, and is admirably adapted for the purposes of this kind of an institution. The managers have secured four adjoining farms containing in all about seven hundred and eighty acres.

The four farm houses are now being used, one for the Administration building, one for residence of the Superintendent, one for patients and one for employes.

In 1884 Dr. John W. Ward, Superintendent of the State Hospital at Trenton, realizing the necessity of separating the epileptics from the insane, went before a legislative

committee and strongly urged the appropriation of \$50,000 to erect a building upon the grounds of that institution for the proper care of the epileptics. The late Prof. S. Olin Garrison, Principal of the New Jersey Training School for Feeble-Minded Children, at Vineland, early recognized the necessity of separate provision for the epileptics in that institution, and was indefatigable in his efforts to establish the present village.

For a number of years the subject was agitated, and in 1895, in accordance with a resolution passed by the Legislature, the Governor appointed a commission to investigate the number and condition of epileptics in the State. The report of the commission was presented to the Legislature of 1896 and a bill was introduced for the establishment of a colony on a plan recommended by the commission. The bill failing to become a law, the New Jersey State Medical Society, by resolution at their annual meeting in 1896, endorsed the necessity of such legislation. In 1897 the President, Dr. Thomas J. Smith, of Bridgeton, most ably presented the necessity of providing for the epileptics, and urged that the State authorities be importuned most earnestly to revive the movement initiated the year before to establish an industrial epileptic colony in our State. The Society reaffirmed its position, and appointed a committee to urge the matter further.

Through the combined efforts of those interested and with the zealous co-operation of Senator Stokes, of Cumberland, who had charge of the legislation, an act was passed by the Legislature of 1898, and promptly signed by Acting Governor Voorhees, making the necessary provisions for the establishment of the institution. The sum of \$15,000 was appropriated for the purchase of a site and to pay for the equipment and maintenance of the village. The "Maplewood Farm," containing about 187 acres, was purchased for \$11,500, and the village was opened for the reception of male patients November 1st, of the same year.

The Legislature of 1900 appropriated \$30,000 for the erection of two cottages for patients, and \$16,000 for the purchase of two farms adjoining the property. Additional appropriations were made each year from 1901 to 1911, aggregating \$900,000, for extensions and improvements. All epileptics of either sex, over five years of age, and not insane or idiotic are admitted.

In 1912 the Legislature appropriated \$78,000 for new buildings.

NEW JERSEY REFORMATORY.

Rahway.

In 1895 the Legislature passed an act, approved by Governor Werts on March 28 of that year, providing for the appointment of a commission to consist of six persons, who were charged with the duty of building an intermediate reformatory institution for first male offenders. The commission was authorized to set apart the property known as the Edgar farm, located in Union and Middlesex Counties, and then belonging to the State Sinking Fund.

If it were found necessary they were authorized to purchase adjoining property for the completion of the site at a cost not to exceed ten thousand dollars, but this authority was not used.

The institution, when completed, was designed to accommodate not less than one thousand inmates, and the sum of one hundred thousand dollars was appropriated to begin the work.

The site now comprises about 115 acres. That which is not occupied by the buildings or enclosed within a stockade surrounding the same, furnishes occupation to the inmates, and is devoted to the purpose of tillage, to supply farm products and sustain the animals used by the institution.

The original Commissioners were Patrick Farrelly, George S. Mott, David M. Chambers, William A. Ure, John T. Daly and Thomas M. Gopsill.

According to the plans originally adopted the building, when completed, was to have four wings, capable of accommodating 1,024 inmates. The first wing and centre were completed in the year 1901, and inmates were then first received.

First male offenders only are admitted between the ages of sixteen and thirty years.

The criminal courts of the State are empowered in their discretion to commit offenders to the Reformatory instead of State Prison. The original commission was replaced by the present Board of Commissioners, consisting of nine persons, including the Governor, and no more than four to be of the same political party.

The reformatory and grounds are located about one and a half miles south of the City of Rahway. The buildings now erected comprise the guard-room build-

ing, northeast and southeast wings, the domestic building and "Tie-to" building, connecting it with the guard-room building, the industrial building, new tuberculous pavilion, independent water system with filtering plant, two trades' school buildings and wall, power house, hospital for contagious diseases, barn, hennery, piggery, shelter station and cold storage warehouse.

The "Tie-to" building, the hospital, the pavilion, barn, hennery, piggery, shelter station and cold storage warehouse were constructed entirely by the inmates and without cost to the State, except for material.

The construction of a sewage disposal system contracted for by the former Board of Managers, has been completed recently by inmate labor.

The inmates are detailed to different trade classes, and do all the work required for betterments and repairs. They enjoy daily educational advantages and are regularly drilled in military tactics.

STATE TUBERCULOUS SANITARIUM.

Glen Gardner.

This Sanitarium, which was completed in 1907, is located at Glen Gardner, near High Bridge, Hunterdon county. The site is on the slope of a mountain nearly 1,000 feet above the level of the sea, where the State has acquired about 600 acres. The slope has been cut away and leveled for a considerable space, and here the buildings were constructed. On a clear day the view from this point is one of the most magnificent in this picturesque section of North New Jersey. It looks away over a rolling country of wooded hills and cultivated farm lands to the mountains on the other side of the valley, which run at its foot. Away in the distance like a thin ribbon of silver is the South Branch river, and in whatever direction the eye turns some new and charming scene is encountered. The structure consists of a service building, administration building and east and west wards. The service building is the source of supplies for the institution. It is 84x110 feet, three stories, including basement, in which is the boiler room, engine room and electric light plant. A cold storage is located in the basement. On the second floor is the main dining hall, which is 84x48 feet, the

service room, bakery, kitchen, storeroom, butcher shop and cold storage. The third floor is fitted up with rooms for the doctors, employees' rooms, ironing, drying and linen rooms, coat rooms, sterilizing room, &c. All the buildings are built of field stone, stuccoed on the outside and finished with white plaster on the interior. The ward building is 32x150 feet and the administration building 52x120 feet. The buildings are so constructed that additions may be made from time to time as the necessity of the case demands. About 175 patients can be comfortably accommodated in the ward buildings. The water supply is derived from a large reservoir which is kept supplied from the springs. The system of sewerage is among the most sanitary in existence. The total cost of the Sanitarium represents an outlay of about \$300,000.

The first impetus for caring for the State's consumptive poor was given in an address delivered in 1900 before the State Medical Society by Dr. Halsey, then president. A bill was drawn by a committee of the society, and was passed by the Legislature in 1902, when a Board of Managers was appointed by Governor Murphy. Of this Board, Dr. Charles J. Kipp of Newark was elected president, and for whom the mountain on which the State Sanitarium was built was named. The Legislature appropriated \$50,000 to carry the bill into effect. The Sanitarium is intended as a model institution, largely educational in character, which would give a practical demonstration of up-to-date methods of treating cases of tuberculosis and point the way for other institutions of a similar type, at the same time extending the direct benefits of its system to as large a number of cases as its necessarily limited facilities would enable it to care for. The institution handles about six hundred cases annually. Its purpose is to arrest the disease in its incipient stage and discharge the patient in such condition that, with the aid of the instruction he receives while at the institution, he may be reasonably certain of being able to effect his own cure. This instruction will prove valuable not only to himself, but to the public in general, as it becomes disseminated through his agency and that of the other patients who undergo treatment and go out again in the world at large. As a rule, the cases selected will be such as can be treated with reasonable expectancy of a cure. In 1912 the Legislature appropriated \$89,500 for new buildings.

BORDENTOWN INDUSTRIAL SCHOOL.

The Manual Training and Industrial School for Colored Youth located at Bordentown, N. J., is a State institution maintained by appropriations from the State and under the supervision of the State Board of Education.

The school was established to meet the educational needs of the colored people of New Jersey and seeks more and more to fit its students to go out and do intelligently the work to which they are called.

The Literary Department as far as is practicable is adjusted to the needs of the Industrial Training, and an effort is made to throw around the student a home atmosphere.

The school occupies a conspicuous site on the banks of the Delaware River, comprising 225 acres of good farm land. The physical equipment of the school consists of an administration building, a girls' dormitory, a boys' dormitory and infirmary, a laundry and carpenter shop, a printing office and a group of farm buildings.

Approximately one hundred students are enrolled, this number exhausting the facilities for accommodation.

Tuition is free and a nominal charge is made for board, washing, medical attendance and registration.

In 1912 the Legislature appropriated \$20,000 for a new dormitory.

STATE REFORMATORY FOR WOMEN.

The Reformatory is located on a farm of 346 acres one and one-half miles from Clinton, Hunterdon county. There are three houses on the farm.

Number one has been enlarged so as to accommodate 25 people—22 women besides the superintendent, nurse and housekeeper. Number two is for the farmer, and the third is a small house for emergency needs. The barns have also been put in order.

Miss May Caughey, the superintendent, took up her residence at the Reformatory the middle of November, 1912.

The Legislature of 1912 appropriated \$20,000 for the alterations necessary to establish the Reformatory.

The Reformatory was dedicated on May 26th, 1913.

PARTY PLATFORMS.

DEMOCRATIC.

(Adopted by the Democratic State Convention at Trenton, September 30th, 1913, and presided over by J. Warren Davis, former Senator from Salem county.)

We, the members of the Democratic State Convention, chosen pursuant to the Geran election law, do adopt the following as our party platform and pledge our support to its articles:

We declare our devotion to Democratic principles, believing that in the observance of those principles our party can best represent the wishes, the hopes and the aspirations of the great mass of the people of the State and country.

We reaffirm our loyalty to our distinguished fellow citizen, Woodrow Wilson, who, as President of the United States, has added fame and lustre to the State of New Jersey. We indorse his administration as President, registering our belief that the courageous, patriotic and intelligent qualities of mind and heart that he devoted to the service of this State as its Governor will add materially to the prosperity and happiness of the people of the nation. We indorse his administration as Governor of this State. Under his guidance progressive legislation, for which the people of our State had been seeking for years and which had been denied them, was enacted, and we are now enjoying the benefits flowing from these legislative acts.

We express pride, also, in the steadfast devotion of our party representatives in Congress to the work of setting free the industries of our country from the burden of unjust tariff taxes, under which private monopolies have grown great and powerful.

We commend the legislative record of James F. Fielder, the President of the Senate, and his administration as Acting Governor. As Member of the Assembly, as Senator and as Acting Governor, he has brought to the public service a high order of ability, freedom from improper alliances and a conscientious determination to faithfully discharge his duties, and he has at all times been a consistent supporter of advancement and reform in legislation and in State government. We recommend his candidacy for the office of Governor to the voters of all parties, believing that his past record is a safe guaranty of his future conduct.

At the last session of the Legislature of this State, which was overwhelmingly Democratic, laws were placed on the statute books for the safeguarding of railroad travel, for the strengthening of the school laws, for instructions to school children to prevent accidents, for the pensioning of widows and their children, for the correction and curbing

of corporation abuses within the State, for the abolition of grade crossings, for the regulation of motor vehicle traffic, for the establishment of a uniform system of weights and measures, for agricultural demonstrations throughout the State, for the extension of the employers' liability act to municipal and State employes, for semi-monthly pay to municipal and State employes, for the establishment of a State department of records and archives, for the use of public school buildings for public gatherings, for the contract system of prison labor, for the establishment of a board of parole for prisoners, besides many other equally important and equally progressive measures. These enactments are an earnest effort of the Democratic party to give to the people of the State honest and progressive government.

We pledge the efforts of our candidates to secure the location and establishment within our borders by the Federal Government of a navy yard, which will bring to the State a large increase in population and wealth and will provide employment for many hundreds of our citizens.

We favor the co-operation of our State Government with the Federal Government in the adoption of a liberal and comprehensive plan for the development and improvement of our inland waterways and the construction of a ship canal across our State, with a sufficient depth of water to permit the passage of vessels of standard draft, thus providing for competition with railroad transportation and making for economy and safety in the shipment of goods and merchandise.

We insist upon the maintenance of our election laws and corrupt practices act inviolate, strengthening them if found necessary, so that the machinery whereby our officials are chosen may be effective for registering the will of the people.

To make sure that the primary vote will express the choice of not less than a majority of those voting upon nomination, we favor the incorporation into the primary law of an adequate system of preferential voting, to the end that the voter may not be confined to a single choice among a number of candidates.

Our State departments, institutions and boards should be thoroughly examined and in many instances rearranged. We believe that their work can be simplified, departments can be consolidated and better administrative business methods devised, all making for economy and a higher degree of efficiency.

The increase in the expenditures of the State under the Democratic administration has been less in proportion to the growth in population and development of the State than the expenditures made by any other State under similar circumstances. In connection with this it must be considered that the State's revenue has largely increased and that a proper proportion between expenditures and

revenues has always been maintained under Democratic administrations.

As a result of this policy our people are particularly fortunate that we have no State debt and no State tax and that the expenses of operating the State government is not borne by the individual taxpayer. Our revenues are derived from inheritance taxes, the tax on railroad property, the tax on corporations and various similar sources. As the State grows in population and wealth our income from these sources increases, and at the same time our criminal, insane and defective charges grow and the expense of the State government increases. The income of the State is wholly applied to the purposes for which it is raised, and there is no treasury deficit. With wise administration of the State funds money can be saved in the management of some offices and departments and applied to the care of others, but the total of all expenditures will remain the same. It is to the proper application of the State funds that we pledge our attentions.

Our municipalities should have more freedom from legislative control. They should have a greater measure of self-government and should be free to operate their functions in local matters through their own legislative boards, and not from Trenton. School districts should have more control over the size, location and erection of their own school-houses, and not be required to issue bonds for schools for a sum beyond which the taxpayers feel they should be called upon to bear.

We pledge our party to maintain our public school system and to adjust it to meet the growing educational requirements of the various sections of our State, and to this end we promise to provide State normal schools for Southern and Northern New Jersey, believing that those sections of our State are entitled to and deserving of said schools.

Our system of taxation needs revision and adjustment. We need a simple and practical method of assessing property, under uniform Statewide rules, by assessors under some responsible control, so that all property shall bear its just portion of the governmental expenses and the unequal burden be removed from the small property owner.

Our charitable, penal and correctional institutions require careful and intelligent attention from the executive and legislative departments of the State. Until effective means can be found for lessening crime and preventing the bringing of defective children into the world, proper provision must be made for the ever-increasing number of the State's wards.

Many of these institutions are overcrowded and limited in operation; many are caring for those who should be transferred elsewhere. The cost of maintenance in many cases is high, and money can be saved through a central purchasing board. All need State help and should have a fair

opportunity to show the maximum amount of usefulness. We pledge our candidates for Governor and the Legislature to confer with the managers and superintendents of these institutions and to co-operate in building up, improving and extending their functions.

We pledge our support to the agricultural interests of the State and to the enlargement and development of the State Agricultural College at New Brunswick and the Experiment Station connected therewith, as well as to farm demonstration work by scientifically trained men, carrying their knowledge and experience direct to the farmer; believe that the enlargement of opportunity for acquiring knowledge of modern and scientific methods of agriculture will result in a large increase in farm and orchard products to the benefit of both consumer and producer, and will favorably affect the cost of living.

We favor the rapid extension of our system of good roads by State aid through all our counties and the enactment of legislation requiring constant supervision and care of such roads, so that they shall at all times be maintained in good condition. The present method of permitting our roads to wear out and become almost impassable and then rebuilding them is wasteful and extravagant and is condemned.

The conservation of our forests, waters and other natural resources must receive careful and wise consideration. Our forests must be preserved and renewed, and the State should gradually acquire the ownership of all potable waters for the benefit of our citizens.

We are opposed to legislation basing appropriations or expenditures upon a percentage of city or county ratables, because of the variable and uncertain amounts to be raised thereby, and in the interests of economy and publicity we advocate stating the maximum amount in figures instead.

We favor legislation requiring the installation of a uniform system of accounting for all municipalities and counties.

We favor the enactment of fewer laws by the Legislature and the prompt publication of all laws as speedily as possible after the conclusion of the session.

We believe that the voters of the State should have the right to decide whether suffrage should be extended to women, and, therefore, favor a submission of this question to popular vote.

We advocate a revision of the rules of the Legislature to prevent ill-considered action on bills and to limit the time for the introduction of bills.

We favor the enactment of such legislation as will conserve the constitutional rights of labor and as well prevent the issuance of injunctions in labor disputes when no property rights are involved and when there is proper remedy at law.

REPUBLICAN.

(Adopted by the Republican State Convention at Trenton, September 30th, 1913, and presided over by Senator William T. Read, of Camden county.)

We, the representatives of the Republican party, chosen according to law, in convention assembled, for the purpose of declaring our principles, under which we ask for the votes of the people of the State of New Jersey, declare as follows:

We invite the co-operation of all citizens who declare a State administration, progressive and constructive in its character.

We earnestly appeal to the young men of the State to participate in this campaign and lend their influence for civic betterment.

All the progressive laws upon the statute books of New Jersey to-day were inaugurated under Republican administration, and extended from time to time by legislative amendment, largely through the efforts of Republican legislators. We pledge ourselves to a continuance of these policies and to the strengthening of such laws when experience shows the need of improvement.

We favor the reorganizing and remodeling of the various departments of the State government and the consolidation of existing departments in the interest of economy and efficiency and a non-partisan business-like administration of public affairs.

We favor the further development of New Jersey, by establishing a comprehensive general plan for public improvement, including a complete system of public roads, whereby all main arteries of travel shall be maintained by the State, and the elimination of all toll roads; the early completion of inland waterways; the construction of a ship canal from the Delaware to the Hudson; state control of all water sheds, so that the potable water supply may be free from corporate ownership; the preservation of our forests; the development of our sea coast resorts; the establishment of a system of docks in our large cities for the encouragement of shipping and the lowering of freight rates; the legislative treatment of sewage along scientific lines.

We favor the immediate protection of human life at existing grade crossings and, in addition, the gradual elimination of all grade crossings throughout the State.

We believe that the work of the Public Utility Commission should be enlarged and extended by the appointment of practical railroad men to act as inspectors and to report and advise with the Commission in all matters pertaining to the regulation of railroad problems.

We favor the revision of the present election laws, which

will simplify voting and reduce the unnecessarily increased expenses of the present system, and, at the same time, strengthen the safeguards surrounding an honest ballot. Thousands of our citizens have been disfranchised by the present complicated, cumbersome and unsatisfactory election laws, and we pledge the people of New Jersey to correct the defects therein.

We favor a preferential system of voting at primaries, which will enable the voters in each party to select candidates favored by a majority of all the voters of such party.

We favor a shorter ballot by the separation of municipal and State elections.

We believe that the State Constitution should be flexible, and to that end we favor a constitutional amendment providing that amendments to the Constitution may be submitted whenever the public needs may require.

We pledge ourselves to submit to the people for the election of Assemblymen by districts and the holding of State and municipal elections in alternate years.

Too many laws are now enacted which, while general in character, regulate specifically minute details concerning the internal affairs of municipalities. We favor an amendment to the State Constitution which will give to the municipalities a broader system of home rule, under which there can be more government at home and less government from Trenton.

We promised last year to provide for the submission to the voters of the State of a constitutional amendment for the extension of the right of franchise to women. We renew the promise we made last year.

We favor a more practical system of education and the improvement of our educational laws, and believe that our present public school system can be carried on with greater efficiency, less expense and with more satisfaction to the people if more power be vested in local boards of education and less power concentrated at Trenton.

We pledge our efforts to the enactment of laws, when the finances of the State will warrant, which will make possible the establishment of two additional State Normal Schools, one to be located in one of the South Jersey counties and the other in North Jersey, and also the enactment of laws for the educational and industrial betterment of our colored citizens.

The laws pertaining to child labor and protecting those who labor were passed under Republican administrations. We favor the strict enforcement, and we favor the strengthening of such laws by requiring employers to provide healthful conditions and to install safety devices, and we pledge ourselves to maintain and strengthen statutes preventing excessive hours of toil for women and children and for the maintenance of health and the prevention of

occupational diseases, and for the further enactment of laws providing for proper lighting and ventilation of tenement houses and the adoption of such other industrial reform as shall be fair and equitable, including peace and more harmonious relations between employer and employe, along modern lines now in apparent successful operation in other countries.

We favor the promotion of scientific agriculture and legislation and appropriations for the benefit of the farmers of the State.

Agricultural New Jersey is a land of unrivaled opportunity. It has already won recognition for the wealth and quality of its agricultural products, but such resources have scarcely been touched. In order to create taxable values, to transform the thousands of acres of undeveloped land into a region of agricultural progress and prosperity; in order to benefit the producer as well as the great mass of consumers, we must make production more efficient and transportation and distribution less costly.

The high cost of living is a world-wide problem. Some of it is due to the individual standard of living. That the law cannot effect. Part of it is due to lack of training and knowledge. This can be relieved by scientific instruction, so as to produce more food per acre and unity of effort, by the encouragement of co-operative societies and municipal markets, to bring the producer and consumer in closer contact.

To this end we pledge ourselves to the enactment of laws that will open wide the door of opportunity to the farmer of New Jersey, by providing agricultural education, accessible to all who would have it. We pledge ourselves to the enactment of such laws as will encourage soil improvement and legislation that will make our trolley system a more vital factor in rural prosperity, and thus reduce the cost of commodities in the market by lessening the cost of transportation.

We pledge ourselves to a policy of the strictest economy in the management of our state departments and the submission of a budget by the Comptroller's Department in time for a thorough discussion of the same by the public and members of the Legislature, before the passage of the appropriation bills. We recognize the tremendous burdens of growing taxation, and we pledge ourselves to give the voters greater power, both in supervision and veto, over local expenditure.

We favor any necessary amendments to the Ramsey insurance rate law, which will prevent a State insurance monopoly.

The lunacy act, passed by the last Democratic Legislature, is unsatisfactory and imposes unnecessary burdens upon the public. We favor a complete revision of this law.

We favor a more effective method of the administration

of our tax laws to equalize valuations and assessments, not only as between individuals, but as between the taxing districts of the State.

We favor legislation requiring the installation of a uniform system of accounting for municipalities and counties of this State.

The Democratic party has covertly attacked the civil service system, both by attempted legislation and administrative subterfuge. We pledge ourselves to uphold and extend the principles of civil service.

We favor a solution of the corporation problems which will result in the punishment of the guilty without punishing the innocent, and we hold that a policy which drives legitimate business enterprises from the State of New Jersey is neither statesmanship nor reform; it is destruction. We favor the enactment of laws which will attract industrial enterprises to our State.

The Republican party stands for a business-like administration; for a simplification and codification of our laws and the prompt printing and distribution of our pamphlet laws at the close of the legislative session.

In national affairs we favor a change in the system of electing delegates to the Republican National Convention, so that representation therein shall be based upon the number of Republican votes cast and not upon population. The Republican party stands for a tariff, based upon the principle of protection, with a duty sufficient to cover the difference between the cost of production here and abroad, which can only be established by scientific investigation by a non-partisan tariff board.

New Jersey ranks third among the states of the Union in the proportion of industrial wage earners to population. These workers are the market of the farmer, of the merchant. They cannot buy without wages, and their wages will be injuriously affected by the Democratic tariff, which is based upon the Democratic doctrine that protection is unconstitutional.

The Democratic party has utterly failed to keep its pledges to the people. It has played politics with the jury system of the State; it has been compelled to call extra sessions of the Legislature to remedy its own blunders; it has made laws which have driven law abiding business enterprises from our State; it has used the direct primaries, not as an instrument to serve the popular will, but as a means for the furthering of the personal ambition of the Democratic bosses, and it has, by neglect of official duty, delayed the submission of constitutional amendments to the voters of the State.

By legislation enacted during the last session, the Democratic Legislature has decreased the income of the State and at the same time increased the appropriations, so that when these appropriations shall have been expended, there

will be a deficit of three-quarters of a million dollars in the State Treasury, and no provision has been made for income from any other sources to make up this deficiency. As a result of this destructive policy of financing, there is imminent danger of a direct State tax. This is one of the glaring examples of the utter incapacity of the Democratic party to conduct the affairs of the State on a business-like basis.

In national affairs the Democratic party has confessed its inability to protect the lives and property of American citizens and missionaries in foreign lands; it has enthroned "King Caucus," and made it a dictator of legislation to the exclusion of deliberation and debate; it has denied the right of petition to those whose business and occupation are threatened by legislative injustice; it has failed in its promise to reduce the cost of living; it has made the great questions of tariff and currency footballs of politics and secret conferences have been substituted for open-door methods.

The gospel of humanity should constitute part of the mission of the State. The elevation of mankind is the aspiration of the age. The object of constructive statesmanship is to promote the welfare of the people and the betterment of the conditions under which each individual lives and labors. The good of the people is the highest law of progress. Equality of opportunity and protection are the sacred rights of every person, and that government is best and safest and most enduring which guarantees to every individual the largest opportunity to make the most of his capacities, while restraining him from entrenching upon the rights of others who are striving to accomplish the same purpose. Let justice and equality before the law crown the prosperity of the Commonwealth.

PROGRESSIVE (ROOSEVELT).

(Adopted by the Progressive (Roosevelt) State Convention, at Trenton, September 30th, 1913, presided over by former Speaker Frank B. Jess, of Camden county.)

We believe that in the organization of the National Progressive party in 1912, and the platform adopted by it, an historic step was taken in the now world-wide movement toward the people in which the yearnings of humanity are finding expression and through which the ideals of the people are to be realized.

We reaffirm our faith in the principles declared in that platform.

We hold that all constitutions and all statutes having sprung from the people are subject to their modification in the methods provided by law, and should be amended or

repealed if at any time any of these instruments of government work injustice or fail to provide exact justice to all classes or to maintain equal opportunity for every citizen without regard to sex, color or previous nationality.

It is time to put humanity as of first importance in government.

The Progressive party, in fidelity to the causes to which it owes its existence, pledges its candidates, if given power, to establish, by legislation or by constitutional amendment, the following principles:

We favor the principle of the initiative and referendum as applied to State legislation and municipal acts and the right to recall all elective officials, to be exercised not less than one year after they are elected.

We favor the Wisconsin system of open primaries, to the end that each voter may vote a primary party ballot without revealing his party allegiance, and the addition of the preferential vote.

In consonance with our cardinal doctrine that a government of the people should be by and for the people, we pledge ourselves to the proposition of the equal right of suffrage for women with men and to such action as may be necessary to put it into effect.

We favor the principles of the Commission Government Act.

We stand for local self-government or home rule in all municipal affairs, including the matter of taxation and including the power to change, alter or amend its municipal charters upon the vote of the people of any municipality.

We believe it is time to attack directly the problem of high and increasing cost of living and to do something definite to prevent the accumulation of enormous fortunes in the hands of a few, and the consequent hardship and poverty among the workers of the State. This problem has got to be solved in part by national laws and in part by State laws. There are two forms of privilege by which a few people are enabled to levy toll upon the earnings of the many without rendering any service which can be reached by State laws. The first privilege is the exaction of excessive rates for trolley, gas, electric light and water service by the public utility corporations of this State. These corporations have issued millions of dollars of watered stock, representing no investment of capital or other service, and their charges are sufficient to earn a return upon this watered capitalization. This is a clear moral wrong. To cure this evil, either each municipality should be authorized to take over and operate any public utility upon just compensation upon the vote of its people, or the Public Utility Commission should be required to establish rates limited to a reasonable return upon the value of the physical property devoted to the public use.

The second privilege to be reached by State laws is the land privilege. The value of the land is due to the pres-

ence, the growth, the enterprise of all the people. The existing taxing system puts a premium upon speculation in land, which is the holding of land out of use, with the expectation of receiving at some future time an increase in value. This operates to keep land, which is the opportunity of labor, out of use, to make congestion in cities, to crowd the labor market, to reduce wages, to raise rents and generally to restrict industry. The remedy is that all the products of labor, such as buildings and improvements, machinery, household furniture, merchandise and other personal property, the fencing, ditching and clearing of farm lands, should ultimately be exempt from taxation, and the taxes heretofore raised from this source for municipal, county and State purposes should be raised by increasing the taxes upon the value of the land. This will encourage industry, make it easier to get a home or to establish and carry on a business, and force idle land into use, thus increasing the demand for labor.

We favor applying this remedy gradually by a law allowing each municipality, upon the vote of its own people, to exempt buildings, improvements and personal property from taxation in whole or in part.

We recommend that the tax on buildings and improvements, household furniture, machinery and merchandise, and the fencing, ditching and clearing of farm lands be reduced 10 per cent. a year and a corresponding increase in the tax rate on land values until the rate of such improvements is one-half the rate on land.

The rules of law governing trade disputes as developed by our courts do not hold the balance of justice even, as between employers and employes.

This is due to the influence of statutes coming down from the fourteenth century and to the legal view which recognizes in the employer a property right in the free flow of labor, but does not recognize in the workman a like right in the free flow of employment.

Laws on the following lines should, therefore, be enacted:

1. Recognizing not merely the right to strike, but the right to use all means and agencies to render the strike effective which are not in themselves unlawful, including the right to use peaceful persuasion, argument and entreaty to procure other workmen of the employer against whom the strike is directed to join therein, and by like means to induce other workmen not to accept such employment, and the right of unions to exercise disciplinary measures in accordance with their rules and by-laws to compel insubordinate members to join in a lawful strike and continue on strike after going out, and the right while a strike is in process to give strike pay and to use the funds of the union in furtherance of picketing.

2. Declaring that no statute forbidding a combination to fix or regulate the price of any article of merchandise or commodity, or to establish a monopoly, or to restrain trade,

shall be held to apply to organization of workmen and the fixing or regulating the price of labor by them.

3. Prohibiting the issuance of any restraining order or injunction in trade disputes without hearing on notice, and then only upon the certificate or testimony of the chief executive of the municipality that he is or will be unable to protect the property claimed to be threatened.

Granting the right to trial by jury in all contempt cases where the acts complained of are not committed in the actual presence of the court.

We favor the strengthening of the laws governing inspection of factories and workshops, to the end that the safety and health of employes may be more carefully safeguarded and the places of labor be made more safe, sanitary and attractive.

We stand for the establishment of the minimum wage standards for working women to provide a living scale of wages in all industrial occupations.

We favor the prohibition of child labor.

We favor the maintenance and strengthening of the laws enacted by the Legislature of 1912 for the suppression of monopoly and the regulation of trusts, commonly known as the "Seven Sisters."

We stand for the protection of the people from exploiting of any kind of fraudulent securities.

We declare for laws embracing penal reform, the humane treatment of imprisoned offenders, the abolition of prison contract labor and the substitution of State work in healthful employments, with the application of at least some of the earnings to the support of the families of persons imprisoned.

We also favor the absolute segregation in trial and confinement of all children and young persons.

We favor legislation for the purchase of all supplies for State institutions through an administrative board.

We declare for the consolidation of boards, bureaus and commissions having cognate duties; the abolition of all unnecessary offices, and the introduction of such economies in all departments and institutions as efficiency will permit.

We insist upon the maintenance of the present civil service laws and the increasing of the efficiency of the same.

We favor the promotion of agriculture and agricultural methods by schools of instruction and assistants to aid in the use of modern methods of farm development and for the increase of crop production.

We favor the conservation by the State of the potable waters of the State, for the purpose of supplying waters by the State, at a minimum of costs, to its municipalities or inhabitants.

We stand for the establishment and consummation of a systematic system of State highways to be maintained by the State, with attendant relief of local taxation for such maintenance.

We declare for the prevention of all tax evasion by banks or other corporations.

We pledge ourselves to laws specifically requiring the Board of Public Utility Commissioners at once to proceed to survey all railroad grade crossings in the State and to classify the same according to the elements of danger involved, and to proceed under the existing legislation continuously to secure the elimination thereof as nearly as may be in the order of their classification, and in the meantime to require the adequate protection of such crossings.

We favor the continuance and completion of the projected and partially completed inland waterways of the State; and of the proposed ship canal across the State with the assistance of the National Government.

We declare for the revision and codification of the Fish and Game law.

We favor the eight-hour day for labor, together with a half holiday and one whole day for rest in each week, and we pledge our candidates, if elected, to endeavor to secure uniform legislation among the several states regulating the hours and conditions of labor.

We favor pure food legislation along the line of strengthening and extending the powers of the State Board of Health to insure the making, selling and using of only pure and wholesome food throughout the State and shipping the same out of, or into the State. Providing ample inspectors for enforcing the law, fitting punishment for breaking the law, and immediate destruction of all impure foods detected.

We favor permitting the jury, in capital cases, to determine, by their verdict, whether the penalty shall be death or life imprisonment.

We favor the principle of the short ballot. The people are called upon to select too many officials. It is impossible for the average citizen to inform himself as to the qualifications of the large number of candidates presented for his suffrage at the average election. The true principle of democracy is the election of a few officials invested with great power, who shall hold office either for short terms or shall be subject to recall at any time upon petition of a reasonable number of the voters. To this end we favor the election of the members of the Legislature by legislative districts instead of by counties; the appointment by the Governor or court or the Board of Freeholders of such county officials as registers, county clerks and surrogates; and the establishment of a small board of three county commissioners or freeholders, with terms of three years, one member to be elected each year.

All this legislation has long been demanded.

It must, when enacted, be subject to the decision of our courts as to its constitutionality.

That a speedy termination of such tests, and of all litigation may be had, and that in case such statutes are

declared unconstitutional the ascertainment and putting into effect of the will of the people may not be unreasonably delayed, we favor:

1. The reorganization of the courts of the State, the simplification of their procedure, the expedition of trials and the speedy final determination of causes by the reduction of appeals.

2. That the Constitution be so amended as to present no obstacle to the future amendment thereof other than such as may be reasonably required to secure the registration of a deliberate public opinion in such amendment.

To clear the way for all legislation in accord with our cardinal doctrine that a government of the people should be by and for the people, and to remove constitutional restrictions which may now inhibit the same, we declare for the holding at an early day of a constitutional convention.

The Progressive party came into being as a protest against corrupt politics, special privilege, boss domination and the fraudulent manipulation of popular elections and representative conventions. It embodies the spirit of civic righteousness, and absolute belief in the rule of the people, and the repudiation of selfishness in governmental affairs. It is to-day the only party sincerely in favor of the unhampered rule of the people in all matters, and the unquestioned and effective regulation and control of monopolies and trusts. It seeks no power for selfish reasons, and no office to promote personal or corporate exploitation. To win or lose is of no concern to it, except as success may promote right, justice and equal opportunity. It is for these objects and in this spirit that the Progressive party enters into the contest now before the people of this State; determined to win, if honorable fighting will do it; and with an honest purpose, if we are entrusted with power, to keep every promise made in this platform, if fidelity to the people can do it.

In this great battle the Honorable Everett Colby has been made our leader by the vote of the people at the direct primary. He is not new to political matters, nor unacquainted with governmental principles. His reputation is not limited by the narrow confines of the State—it is nation-wide. He has been for years a leader in reform legislative movements; he is a student of political and economic affairs; he is a pioneer Progressive. His integrity cannot be questioned; he is a man of education and refinement; he is the friend of every man needing help, the champion of the cause of every citizen in his battle against injustice and oppression, and he stands for equal opportunity. He is, indeed, fitted to fill the office of Governor. He has the moral, mental and physical equipment to lead in such a fight as ours, and he well deserves the vote of every liberty-loving citizen in New Jersey. If he shall be elected, none giving it will ever have cause to regret their vote.

SYNOPSIS OF SCHOOL LAW.

The State Board of Education consists of eight members, not more than one of whom shall reside in the same county, and not more than four of whom shall belong to the same political party. It has control of the State Normal Schools, the School for the Deaf and the Manual Training and Industrial School for Colored Youth. It confirms the appointment of the county superintendents of schools, decides appeals from the decisions of the Commissioner of Education, and makes rules for the granting of teachers' certificates and for carrying into effect the school laws of the State. It appoints an inspector of school buildings and an inspector of accounts.

The Commissioner of Education is appointed by the Governor and confirmed by the Senate. He appoints the county superintendents of schools, decides controversies that arise under the school law; may withhold the State school moneys from any district for neglect or refusal to comply with the provisions of the school law, and has general supervision of the public schools. There are four assistant commissioners; one acts as inspector of secondary schools, another as inspector of elementary schools, another as inspector of industrial education, and another to hear controversies and disputes arising under the school law.

There is a superintendent of schools for each county, appointed by the Commissioner of Education and confirmed by the State Board of Education. The County Superintendent apportions the school moneys among the districts in his county, has general supervision of the schools and, in connection with the local Board of Education, prescribes the course of study to be pursued in the district.

Each municipality in the State constitutes a school district, unless by a vote of the people two or more municipalities decide to unite and form one district. There are two classes of school districts, cities forming one class and all other municipalities the other, but a district in either class may, by a vote of the people, be transferred to the other class. The members of the Board of Education in a city school district are appointed by the Mayor.

In order to be eligible to membership in the Board of Education, a person must be a citizen of the United States and must have been a resident of the district for at least three years immediately preceding his or her election or appointment and must be able to read and write. A city school district may have a city superintendent, but until one is appointed the County Superintendent has supervision of the schools.

In each city school district there is a Board of School Estimate, consisting of the Mayor, two members of the body having the power to make appropriations for city purposes, and two members of the Board of Education. The Board of Education presents its estimate of the amount of local appropriation needed, and the Board of School Estimate certifies to the body in the city having power to make appropriations, the amount to be raised for school purposes. The amount so certified must be raised.

In districts other than cities the Boards of Education consist of nine members each, elected by the people on the third Tuesday in March. The term of office begins the first Monday in April. The qualifications for membership are the same as in city school districts. The special district school tax is voted either at the annual meeting or at a special school meeting called by the Board of Education. Bonds for school houses are authorized by the legal voters. School bonds cannot be sold at private sale except to the Trustees of the School Fund or Sinking Fund Commissioners unless said Trustees or Commissioners have refused to buy them. Bonds cannot be delivered to any purchaser other than the Trustees of the School Fund except upon payment of full purchase price. Women may vote at district meetings on all questions except the election of members of the Board of Education, which is prohibited by the Constitution. Truant officers and janitors cannot be discharged or their compensation decreased except for cause and after a hearing.

Funds for the support of schools come from the following sources: First, from the income of the State School Fund. The principal of this fund is derived almost entirely from the sale and rental of lands under water belonging to the State. The principal cannot be used for any purpose, and the income can be used only for the support of public schools.

This income amounts to \$200,000 per annum. Second, from State appropriation made by the Legislature to reduce the State school tax. Third, from State school tax, an amount which when added to the State appropriation will make a sum equal to two and three-fourths mills on each dollar of the taxable property in the State. Fourth, the railroad tax received by the State in excess of one-half of one per cent. of the value of the railroad property. Fifth, interest of surplus revenue, and Sixth, local school tax.

The \$200,000 from the school fund is apportioned among the counties by the State Superintendent on the basis of the total days' attendance of pupils in the public schools. The State appropriation is apportioned among the counties by the State Comptroller on the basis of the ratables. Ninety per cent. of the State school tax paid by each county is returned to it, and the 10 per cent. received from all the counties forms the reserve fund, which is apportioned among the counties in the discretion of the State Board of Education. The railroad tax is apportioned on the ratables.

The County Superintendent apportions to each district \$600 for the Superintendent or Supervising Principal, if there be one; \$500 for each teacher in a special class for sub-normal children; \$400 for each Assistant Superintendent, and for each permanent teacher employed in a high school having a full four-years' course of study; \$300 for each permanent teacher employed in a high school having a full three-years' course of study; \$200 for each permanent teacher employed in any kindergarten, primary or grammar grade or in a high school having less than three years' course of study; \$80 for each temporary teacher employed more than four months; \$80 for each evening school teacher; \$25 for each high school pupil for whom a tuition fee is paid to another district; \$5 for each pupil below the high school grade for whom such tuition fee is paid, and 75 per cent of the cost of transportation of pupils to schools in other districts. The balance of the State school moneys received by the county is apportioned on the basis of the total number of days' attendance of the pupils.

The custodian of municipal funds is the custodian of school moneys, unless the Board of Education appoints the collector as custodian. In either case, the compensation of the custodian must be fixed by the Board of Education and

paid from school funds. If there are two or more municipalities in the district, the Board of Education may appoint its own custodian.

Each collector must pay to the county collector the amount of State school tax due from his taxing district not later than December twenty-second. If the tax is not paid by that date the County Superintendent must withhold the amount of reserve fund apportioned to the district and divide it the following year among all the districts in the county. The county collector must pay the State school tax to the State Treasurer not later than January twentieth.

If a district provides a course in manual training, and such course is approved by the State Board of Education, the State will give to such district each year a sum equal to that raised in the district for manual training, provided the amount raised is not less than \$250 or more than \$5,000.

Every district must provide free text-books and supplies for all pupils and must also provide a flag for each school house, which flag must be displayed every day the school is in session. The selection of a text-book requires the vote of a majority of the whole number of members of the Board of Education. A Board of Education must employ medical inspectors and attendance officers.

Every school which raises \$20 to establish a school library may receive a like amount from the State. After the first payment, the State will give \$10 each year that the school raises the same amount. Library moneys may be used for library books, reference books, apparatus, or educational works of art.

All plans for school houses must be submitted to the State Board of Education for suggestion and criticism. Every school house hereafter erected must comply with the following requirements: First, light must be admitted to the class room only from the left and rear. Second, the total light area must equal 20 per cent. of floor space. Third, there must be 18 square feet of floor space and not less than 200 cubic feet of air space for each pupil. Fourth, all rooms must have a proper system of ventilation which will supply 30 cubic feet of fresh air per minute for each pupil. Fifth, all ceilings must be at least 12 feet in height and all stairs

must be at least 4 feet wide, with intermediate landings, enclosed in brick walls or by partitions of slow-burning construction, and without open wall holes. Sixth, a school house having eight rooms must have two flights of stairs, each four feet in width, or one flight not less than six feet in width, one having from eight to sixteen rooms, two flights of stairs not less than five feet in width, and one having sixteen or more rooms, four flights of stairs not less than four feet in width, or two flights not less than six feet in width. Seventh, all ceilings must be either metal, wood or plaster on metal laths and painted white or some light tint.

A person cannot be legally employed as a teacher unless he holds a teacher's certificate in full force and effect at the time he begins teaching. Before beginning to teach he must show his certificate to the Superintendent of Schools. A Board of Education may adopt rules governing the employment of teachers. In the absence of rules, the contract must be in writing in triplicate, one copy filed with the Board of Education, one with the County Superintendent, and one with the teacher. The employment, promotion or dismissal of a teacher requires the vote of a majority of the whole number of members of the Board of Education. After three years' continuous service a teacher cannot be removed except upon charges and after a hearing.

All persons appointed as teachers, principals or superintendents, who have not taught in this State prior to January 1st, 1908, are members of the Teachers' Retirement Fund by virtue of such appointment.

The State Board of Examiners consists of the Commissioner of Education, the Principals of the Normal Schools and a County Superintendent and a City Superintendent appointed by the State Board of Education. This Board issues certificates valid in all parts of this State and in any school or grade.

All kindergarten teachers must hold special kindergarten certificates. Special certificates may be issued for kindergarten, physical training, manual training, music, drawing, modern languages, commercial branches, cooking, sewing, agriculture and penmanship. All applicants for certificates must file testimonials of good moral character, and, in case of previous experience, of success as teachers.

Graduates of the Normal Schools receive State certificates. Graduates of normal schools in other States may have their diplomas endorsed, provided the course of study pursued is equivalent to the course in the New Jersey Normal Schools, and the State in which they were issued grants reciprocal privileges to graduates of the New Jersey Normal Schools.

All children between the ages of 5 and 20 are entitled to attend the public schools in the districts in which they reside. If a kindergarten has been established, children 4 years of age may attend. A Board of Education must provide suitable school facilities for all the children desiring to attend school. The Board of Education may provide for the education of pupils in the higher grades by payment of tuition fees to adjoining districts. If a child lives remote from any school in the district, the Board may transport such child to school or pay for its tuition in another district. A Board of Education may close a school and transport all the children to another school. Children who have never attended any school can be admitted to a public school only during the ten days immediately following the opening of the school in the fall and during the first five days in January and April, except by the vote of a majority of all the members of the Board of Education.

All children between the ages of 7 and 16 must attend either a public or private school every day such school is in session, unless they are taught at home or are physically or mentally unfit to attend. Children between 14 and 16 years of age who have completed five yearly grades may be granted certificates permitting them to go to work. The parent of a child who does not attend school may be proceeded against before a magistrate as a disorderly person. If the parent is unable to control the child, such child may be proceeded against as a disorderly person.

Corporal punishment in all public and private schools is absolutely prohibited.

BIOGRAPHIES.

GOVERNOR OF NEW JERSEY.

JAMES FAIRMAN FIELDER.

Governor Fielder was born in Jersey City, February 26th, 1867. His ancestors on his mother's side were Hollanders and on his father's side, English. They were among the earliest settlers in the State of New Jersey. The families of both father and mother of Governor Fielder have been well known in the religious and political history of the State. His mother was Eleanor A. Brinkerhoff, a sister of former Senator William Brinkerhoff. His father was George B. Fielder, Register of Hudson county and member of the Forty-third Congress. His paternal grandfather was a leading citizen of Jersey City and was a member of Assembly from the county of Hudson in 1871, and his maternal grandfather was for many years a county judge of Hudson county. The Brinkerhoffs were pioneers in the establishment of the Dutch Reformed Church in the State, and took a very prominent part in establishing and erecting the old Bergen Dutch Reformed Church which now stands near Bergen Square in Jersey City, one of the oldest churches in the State. The Governor is a member of St. John's Episcopal Church in Jersey City.

Governor Fielder attended the public schools and high school of his home city, and later finished at the Selleck School at Norwalk, Conn. He attended Columbia University Law School, from which he graduated in 1887 with the degree of LL.B. After his graduation he served his apprenticeship in the office of his uncle, ex-Senator Brinkerhoff, and was admitted to the bar in 1888. He was a member of the House of Assembly from Hudson county in 1903 and 1904, and in 1907 was elected to the Senate. In 1910 he was re-elected by the largest majority of votes ever given to

a State Senator from his county. On June 4th, 1895, Governor Fielder married Mabel Cholwell Miller, of Norwalk, Conn.

In his younger days Governor Fielder was a member of the Democratic County Committee of Hudson county, and since his entry into politics he has progressed step by step. He occupied positions of prominence on the most important committees of the House of Assembly during his terms in that body, as well as in the Senate. He was elected President of the Senate by his colleagues in January, 1913, and when Governor Wilson became President of the United States he became Acting Governor by virtue of the constitution. The election of Governor Fielder as President of the Senate was more significant than other elections to this important office, because at that time Governor Wilson had been elected President of the United States, and it was known that the member of the Senate elected as president of that body would be the Governor of the State to succeed Governor Wilson. His Democratic colleagues in the Senate cast their votes unanimously for Governor Fielder, and his election met with the universal approval of his party. President Wilson himself was so well pleased with the selection of his successor that in his message to the Legislature, delivered prior to his departure from the State to take up his duties as President, he expressed his satisfaction as follows:

"May I not in closing express the satisfaction I feel in the knowledge that when I lay down the duties of Governor I shall leave them in the hands of Senator Fielder, a man of proved character, capacity, fidelity, and devotion to the public service, a man of the type to which the people of this State desire their public men to conform."

Governor Wilson resigned his office as Governor on the 1st of March, and in turning over to Senator Fielder the great seal of the State in the presence of the House of Assembly and Senate assembled in joint session, he again paid a glowing tribute to the qualifications of Governor Fielder.

Governor Fielder served as Acting Governor from March 1st to October 28th, 1913, when he resigned as Senator from Hudson county, thus creating a vacancy in the office of Governor, and was succeeded by Leon

R. Taylor, of Monmouth county, Speaker of the House of Assembly.

James Fairman Fielder was nominated as a candidate for Governor at the primary election held on September 23d, 1913, by a majority of 45,299, over Frank S. Katzenbach. At the regular State election held on November 4th, he was elected Governor over Edward Casper Stokes, Republican, and a former Governor, by a plurality of 32,886. He was inaugurated on January 20th, 1914, for a term of three years. His salary is \$10,000 per annum.

Fielder, Dem., 173,148; Stokes, Rep., 140,298; Colby, Prog., 41,132; Reilly, Soc., 13,977; Mason, Pro., 3,427; Butterworth, Soc.-Lab., 2,460; Dwyer, Ind., 875. Fielder's plurality, 32,886.

UNITED STATES SENATORS.

JAMES E. MARTINE, Plainfield.

Senator Martine, who, on March 4, 1911, succeeded John Kean as one of the United States Senators from New Jersey, has the distinction of being the first member of the Upper Chamber of Congress from an eastern state, who obtained his election as a result of a direct vote of the people.

Mr. Martine was elected United States Senator in a joint session of the Legislature on January 23, 1911, following an exciting and notable campaign resulting from the demand that the Legislature acquiesce in the choice made in the direct primaries on September 13, 1910. Under the direct primary law, Mr. Martine submitted himself as an aspirant for the Democratic nomination for United States Senator. He received 47,458 votes, or four times as many as his opponent.

Senator Martine was born in New York City, August 25, 1850. Subsequently his parents moved to Plainfield, where his father, Daniel W. Martine, purchased a farm of 160 acres, surrounding a house which is now 175 years old and in which the Martine family live. Senator Martine's father died when the former was still in his teens and since that time he has been actively engaged in directing the affairs of the Martine estate. For thirty years Senator Martine was engaged in practical farming on the acres left by his father. In recent years, he has combined farming with real estate operations. Of the original farm, 100 acres have been developed into fine residential property under the personal supervision of the Senator and is now intersected by numerous streets along which are beautiful houses, more than fifty of which were constructed under his direction.

Senator Martine has been active in public life of New Jersey for more than forty years. Several times he has been a candidate for Representative in Congress and for Legislative office in New Jersey, but in each instance he has accepted the nomination for of-

office at the urgent request of the Democrats of his district and not as a self-seeker for political honor. He would never accept an appointive office. His term will expire in 1917.

WILLIAM HUGHES, Paterson.

Senator Hughes succeeded Senator Frank O. Briggs in the United States Senate on March 4, '913. Mr. Hughes was chosen for Senator at the Democratic primary election held on September 24, 1912, the vote being as follows: Hughes, 62,532; Smith, 33,490; McDermott, 5,291; Wescott, 3,859. The Legislature ratified the selection.

Senator Hughes was born in Ireland, April 3, 1872. He came to this country at an early age, received a common school education, worked in the silk mills of Paterson, studied typewriting and stenography at a business college in that city and became a law student in the office of William M. Rysdyk, of the same city. He enlisted in Company A, Second Regiment, N. G. N. J., in 1898, and served five months at Sea Girt and Jacksonville, Fla., during the Spanish-American war. At Sea Girt he was detailed as stenographer to Governor Voorhees and at Jacksonville to Major-General Fitzhugh Lee. When the regiment was mustered out of service he entered the law office of William Nelson Paterson, and subsequently that of Attorney-General John W. Griggs, and in June, 1900, was admitted to the bar. He has always been closely identified with organized labor and was counsel in several important cases. He was a member of Congress eight years and was appointed Judge of Passaic county in 1912.

He resigned the office of Representative in Congress in September, 1912, and the judgeship a short time before he took his seat in the United States Senate.

J. THOMPSON BAKER.

(Dem., Wildwood.)

Mr. Baker comes of Colonial stock, his family being one of the oldest in America. He is the son of a Penn-

sylvania farmer and was born in Union County, Pa., April 13, 1847, and is an attorney and counsellor-at-law. He was educated in a country school and in Bucknell University; then studied law with the late Judge Bucher, of Lewisburg, Pennsylvania. He practiced law with eminent success; was for twelve years president of the Union National Bank, and was concerned in every public improvement.

A quarter of a century ago Mr. Baker and his brothers became much interested in the development of South Jersey, and founded the City of Wildwood, where he resides. The marvelous growth of this far-famed resort is identified with the name of Baker Brothers.

In 1911 Mr. Baker was elected Mayor of the newly-consolidated City of Wildwood, but was retired from that office through the substitution of commission form of government, September, 1912.

Mr. Baker was elected to Congress by a plurality of 3,800 over Gardner, Republican.

THIRD DISTRICT.

Middlesex, Monmouth and Ocean Counties.

(Population, census of 1910, 230,478.)

THOMAS J. SCULLY.

(Dem., South Amboy.)

Mr. Scully was born in South Amboy, N. J., September 19, 1868, and is in the towing and transportation business. He received his education in the schools of his native town and at Seton Hall College, from which he was graduated with honors. His father, John Scully, established the towing business when the Congressman was only six years old. When he left college young Scully was taken into the business by his father, and from that time dates the remarkable growth of the Scully Towing and Transportation Company, which is far in excess of anything of its kind on this hemisphere. Fifty odd ocean-going tugs and barges, bearing the sign of this company, transport

over a million tons of freight a year. They poke into all the quarters of the world.

John Scully started his towing business in 1874, practically as a local enterprise. He towed all the freight from the Pennsylvania terminal at South Amboy, up to New York harbor, and in due time also got the terminal business of the Lehigh Valley at Perth Amboy. His enterprise thrived as the railroad business thrived, and, indeed, it thrived only too well, for the Pennsylvania Railroad Company, seeing its success, decided to go into the towing business itself. Its own fleet of tugs steamed up the bay, took the lighters, and left the Scully tugs to lie at their docks or seek other fields. The Lehigh Valley followed suit.

It was while the Scully tugs were seeking other fields that Thomas stepped from college to the towing office. While his father is still in the business, the son is now the actual head of the towing and transportation company, and he is the man who has raised the business from a local to a world-wide one. The company employs from 500 to 600 men, pays the best wages in New York harbor and surrounding waters and has never had any kind of trouble with the hands. Mr. Scully knows every detail of navigation. He can handle every one of his boats, and, what is more, he knows everything about their construction. He superintends his own shipbuilding, so that to the last inch his craft and their needs are familiar to him.

Mr. Scully served three years with credit in the South Amboy Board of Education, then dropped out of sight as a public official for a dozen years.

South Amboy became a city in 1908. The town had been backward in growth, and its citizens thought it might do better as a full fledged city. But, after a few months, its mayor, Dr. Ambrose Treganowan, resigned, and affairs were in so upset a state generally that progress seemed further off than ever. Mr. Scully was chosen by Council to fill the unexpired term. In November, 1909, he was nominated by the Democrats for re-election, and won by a vote of about two to one. Then he set up a definite platform of things he proposed doing. And he sent a message to City Council asking that his platform plans be carried out. They were not trifling things, either, for

a city of the third class. He established a new sewerage system, improved the water accommodations and the public docks, and reorganized the fire and police departments. All this being done with a lower tax rate.

Mr. Scully was a delegate to the Democratic National Conventions of 1908 and 1912, and Presidential Elector in the former year. In 1910 he defeated Benjamin F. Howell, Republican, for Congress, by a plurality of 4,497. He was re-elected to Congress in 1912 by a plurality of 6,233 over Benjamin F. S. Brown, Republican.

During this period he improved his general education and technical knowledge of electricity through the medium of night and correspondence schools. He obtained his education in the parish school of the Trinity Evangelical Lutheran Church and the public schools of the city of Trenton. Before he was fourteen years of age he began to learn the pottery trade. During the latter part of his apprenticeship he began the study of law at night, having entered his name with the late Levi T. Vredenburg, who came to New Netherlands from The Hague in May, 1658, in the ship Gilded Beaver.

Peter Vredenburg, father of the present Judge, was a prominent jurist in both State and nation. He served two terms as an Associate Justice of the New Jersey Supreme Court, being first appointed by Governor Price, in 1855, and again by Governor Olden in 1862. Many of his decisions are regarded as being among the ablest reported.

Judge Vredenburg was born August 19th, 1840; was graduated at Rutgers College in 1859; studied law in the office of the late Governor Joseph D. Bedle; was admitted to practice as an attorney in June, 1862, and as a counselor in June, 1865. He is one of three sons, all of whom were lawyers.

After his admission, young Vredenburg began the practice of his profession at Freehold, his native town, and has continued to carry on the law business there ever since, with the exception of about a year, 1864, when he was located at Eatontown, to continue the business of his brother, Major Peter Vredenburg, Jr., who was absent in the military service, and who was killed September 19th, 1864, at the battle of Winchester, Va., at the head of his regiment.

In 1865 Mr. Vredenburg formed a law partnership with Philip J. Ryall, which continued for about five years, until Mr. Ryall's failing health compelled his retirement from practice. In the exciting general election of 1884, Mr. Vredenburg was nominated by the Republicans of Monmouth county for State Senator, and was only defeated by the retirement of the regular Democratic candidate a few days before the election and the fusion of the Democrats and Prohibitionists, and by a very narrow majority.

In 1897 he was one of the special Commissioners to consider the question of railroad taxation, whose report became enacted into the body of the tax laws.

He made such a success of the venture that, a couple of years later the society concluded to open a second branch store. Mr. Waldron was again the unanimous choice of the directors for the management of the newer place.

Twelve years ago, Mr. Waldron decided to go into business for himself. He developed a business corner that had for years been regarded as a hoodoo into one of the most prosperous in Trenton. State Board of Assessors.**FOR THE ASSESSMENT AND TAXATION OF RAILROAD AND CANAL PROPERTY.**

Charles E. Hendrickson, Jr., President; George L. Record, Isaac Barber, Frederic A. Gentieu. Irvine E. Maguire, Secretary; George William Barnard, Assistant Secretary; Louis Focht, Engineer.

This department of the State Government was created under an act of the Legislature, entitled "An act for the taxation of railroad and canal property," approved April 10th, 1884.

The work of the Board was increased during the same year by the passage of another act, entitled "An act to provide for the imposition of State taxes upon certain corporations, and for the collection thereof," approved April 18th, 1884.

By an act of the Legislature of 1900 (taking effect January 1st, 1901), this Board is further charged with the assessment and apportionment of the municipal franchise tax to be paid by persons, copartnerships, associations or corporations using or occupying public streets, highways, roads or other public places.

The report of the Board for the year 1913 shows that 133 railroad and canal companies within the State are subject to taxation. These companies represent more than 2,400 miles of railroads and 175 miles of canals.

The following table is a summary of the valuation and assessment of railroad and canal property for the year 1913, subject to review by the Board, which review is now in progress:

GOVERNOR FIELDER'S INAUGURAL MESSAGE.

Gentlemen of the Senate and General Assembly:

Taking advantage of that provision of our Constitution which empowers the Governor, whenever he considers it necessary, to communicate to the Legislature the condition of the State and to recommend such measures as he may deem expedient, and following the custom of incoming Governors to deliver an inaugural message, I submit for your consideration certain matters which I believe of interest to the people of our State. It is unnecessary to refer now to all subjects which will or should be brought to your attention at this session, and it is my purpose to speak only of those which appear to be of pressing importance, reserving other matters for future messages.

I am much concerned that this session shall be marked with care, deliberation and earnest thought, so that hasty and ill-considered legislation shall not be enacted. Too many bills are introduced of not the slightest importance to the State at large and too many unnecessary and defective laws are enacted each year. Notwithstanding the constitutional limitation against special legislation, I venture to assert that two-thirds of our laws are passed to meet special cases or to serve special purposes. At last year's sessions, nearly fourteen hundred bills were introduced, of which about four hundred became laws. While it is the duty of each member to serve the people of his county by endeavoring to secure legislation for their benefit, it is also his duty to the State not to clog the processes of legislation with useless suggestions in the form of bills or to attempt to secure special advantages for those who should be governed by general laws. The proof of a legislator's capacity and usefulness is not to be found in the great number of bills he may introduce and pass, but rather in the quality of the few which bear his name. Each member should carefully scan and consider all bills offered to him for introduction and he should have the courage and good sense to refuse those he knows cannot or should not become laws. I am informed that not so many years ago, legislative bills were not printed at State expense, but that each member paid for the printing of his own bills. If that

were still the rule, I could easily imagine that neither the volume of bills introduced, nor the laws enacted, would be so large.

One of the evils of legislation has been due to the introduction and passage of bills up to the closing hours of the session, when in the attendant rush and excitement, imperfectly prepared and improper legislation has been enacted. The Governor has only five days within which to consider bills after they reach his office and he cannot give the time for consideration that he would wish, to the mass of passed bills thrown at him at the conclusion of a session. In these days the veto power is not considered a sufficient barrier against improper legislation, and the failure of legislators to act with deliberation, thought and good judgment, has helped to produce a distrust of legislative bodies, resulting in the suggestion of various devices and expedients to curb and limit their action.

With these thoughts in mind, I commend your proposition to limit the time for introduction of bills and to require that a reasonable period shall elapse between their introduction and consideration, as also the provision I understand you are to make for a legislative reference bureau and for a legal adviser, who shall prepare and criticise bills. The adoption of these remedies for checking the evils of which I have spoken, entailing but slight expense, indicates your desire for safe and sane legislation and merits general approval.

Our State expenditures have increased from year to year, in consequence of our growth in population and the natural placing of heavier burdens upon our departments and institutions. This increase in expenditures has been met by a gain in income, but the difficulty which has confronted preceding administrations is that our income has not kept pace with the demands made upon it. We must husband our resources, exercise a more careful watch over our outlay and see that each dollar expended brings its full return to the State. There is a widespread belief that money is wasted through a multiplicity of departments, boards and commissions and that by simplification in administration and consolidation of departments, our revenues can be conserved and expended to better advantage. I believe that much can be accomplished in this direction, but it is not my intention to deal with the subject in detail at this time, for the reason that the Economy and Efficiency Commission, appointed pursuant to a joint resolution of the session of 1912, has had this matter under investigation, and I am assured its final report will be presented to you within

a few weeks. I feel that this commission has devoted much time to a searching examination of the functions of and the results accomplished by our State departments and that its report will contain information and recommendations of great value to you. With this report so near completion, it would be unwise to attempt any reorganization scheme without the benefit of the conclusions of the commission and I therefore recommend that you await its findings before proceeding. I would refer you in the meantime, to the preliminary report presented by the commission to the session of 1913.

The sentiment of these enlightened times demands a change in the care and treatment of prisoners in our penal institutions. The idea that offenders against our laws can be reformed by confinement and punishment alone, is obsolete. Confinement within prison walls and harshness and severity never has and never will check crime, and the proper treatment of convicts must receive more intelligent thought. Criminal tendencies are very frequently the result of mental or physical defects and the lack of education, decent surroundings and bodily nourishment. The State should be more concerned in ascertaining and, if possible, removing the cause for crime, than in administering punishment. With first offenders especially, the State can hope for better results from a more thoughtful and modern system of treatment. A careful mental and physical examination should be made under the direction of the prison authorities of each person sent to a penal institution, and a serious attempt made to cure or relieve the ills that such an examination discloses. Prisoners should be placed at some occupation which they can continue after the expiration of their sentence, for the benefit of their physical selves and to help pay for their maintenance while in confinement and to fit them to earn their own livelihood after discharge. Prison labor contracts should be terminated as speedily as possible and the prisoners placed at work under State direction and an effective State-use system installed. We have taken a step in this direction with the inmates of our State's Prison, but sufficient funds have not been made available by the Legislature to make much more than a start. Placing men at work upon the roads, the purchase of a farm and a quarry (the latter not yet actually acquired), will provide for some of the prisoners, but more funds are necessary for these purposes, as well as for the industrial employment in shops of those who cannot be placed at labor outside the prison.

Intimately connected with this, is the establishment of a business-like plan for the management of prison labor and the disposition of the products thereof. There are too many boards and officials connected with this work and with prison control, and this results in friction, a loss of efficiency and unnecessary expense. I recommend that the Prison Labor Commission and the Board of Inspectors of the State's Prison be abolished and that a new board be created to have entire charge and management of the State's Prison and of all places at which convicts are put at work; that the keeper of the prison be placed under the authority of this board, as the superintendent of the prison, and be relieved from responsibility for the escape of those engaged at outside work, and that this board have control of the disposition of products of convict labor. Such a plan should lead to better results in the performance of the State's duty to its criminal class, as well as to economy in operation.

I have given some attention to our charitable and correctional institutions, and during my term of office I intend to secure a more intimate knowledge of their operation and a better understanding of their needs. The members of legislative committees on these institutions, too, will do well to visit them and acquaint themselves with their functions and management, for I feel they have been much neglected by the State. Many are overcrowded and some are caring for those who should be transferred elsewhere. The per capita cost of maintenance of some seems high and it is not unlikely that money can be saved by their boards of managers, but all need State help and a fair opportunity to show the maximum amount of usefulness. The members of the boards of managers are for the most part conscientious men and women devoting their time and thought unselfishly and intelligently to the care and relief of the poor unfortunates committed to their charge. The Legislature should coöperate with these managers and the Appropriation Committee should give them all the financial assistance the State's resources will allow. Those members of boards who are not interested in their work, or who cannot find the time to devote to it, should promptly resign so that their fellow-members can be given the aid and assistance of others, who can and will share their burdens.

The matter of jury reform is still unsettled. You will recall that this subject occupied much of the attention of the last Legislature and that a special session was called to pass a bill changing the method of drawing grand and petit jurors, to the end that scan-

dals in the administration of justice, due to political influence and corruption in some of our counties, would never again occur. I was sure our people desired this reform and as Acting Governor of the State, in a message to the special session, I urged that a bill be passed without a referendum. It was my opinion that a jury commission, appointed by Supreme Court Justices, offered the proper and effective solution, but that session resulted in the passage of a bill providing for a commission consisting of the sheriff and one citizen of each county, the latter to be appointed by the Chancellor, and directing that the acceptance of the act should be submitted to the people of the whole State at the last general election. Another bill was passed at the same session, taking effect at once, reforming and safeguarding the method of selection by the sheriffs, of our grand and petit jurors and was therefore in operation before the general election. Upon the submission of the "Chancellor-Sheriff Act" to the voters, it was adopted by a very large majority, thus clearly indicating their preference for that act, rather than for the other act passed at the same session. The constitutionality of the "Chancellor-Sheriff Act" has been attacked and is now before our courts, a justice of the Supreme Court having declared it unconstitutional because of the State-wide referendum and an appeal is now pending in the Court of Appeals. The question of the adoption of this act having been decided by the voters in unmistakable terms, there cannot be the slightest question as to the duty of the Legislature in the premises, or any room for further argument as to what kind of jury reform this State desires. There may be some matters of mere detail in the "Chancellor-Sheriff Act" which need correction, but the obligation of the Legislature to pass the bill again, without a referendum, is so plain that it is idle to do more than set forth the facts.

Two constitutional amendments are suggested, both of which I approve and which I think have the approval of a very large majority of our citizens. The first will provide for a more liberal method of amending the Constitution by submitting any proposed amendment, after it has passed two sessions of the Legislature, to the voters at the following general election instead of a special election, as now required and by eliminating the present constitutional prohibition against voting on amendments oftener than once in five years. The second amendment to which I refer relates to the creation of Assembly districts in those counties entitled to more than one Assemblyman. Under our system of nomination and election, it is pos-

sible that candidates for Assembly can be nominated and elected from one section of the county, leaving the balance thereof unrepresented and that the Assemblymen elected may all represent one political party or a faction of a party. The creation of Assembly districts will make the first impossible and lessen the possibility of the other.

Various attempts to pass a constitutional act under which our counties may be governed by a small board of freeholders have failed, mainly because this legislation has been complicated by the enactment of many laws and by many court decisions on the subject. The citizens of those counties which have adopted the small board, are satisfied with the change and several counties now having the large boards have expressed their desire for smaller ones. It appears to be the general sentiment of the State, that municipal affairs can be more satisfactorily administered by fewer men than by a large number, where responsibility for misgovernment is divided between and shifted from one set of men to another. I believe it to be the duty of the Legislature to pass a mandatory bill which will give a small board government to all counties.

Many complaints are heard concerning our increasing tax burdens. One reason for the increase is the growing expenditures of our municipalities, part of which is due to mandatory acts and especially to those fixing appropriations upon a percentage of assessed valuations. This is improper legislation and should cease. Another part of the increase is due to municipal extravagance which can be checked through the power of the ballot.

Another reason for increased tax burdens is found in improper methods of assessment, and this also results in inequalities in taxation as between municipalities and individuals. The root of this difficulty is in the assessor, in whose selection the question of fitness generally plays but a small part and who receives an inadequate compensation for the work he is supposed to perform. The elected assessor usually gives poor satisfaction. The average annual salary in this State is about \$370, and some assessors, who have a quarter of a million of valuation to assess, receive the munificent sum of ten dollars per year. If we can devise a way to secure competent and faithful assessors and place them beyond political control, I believe the cause for complaint would be largely removed. As a simple plan (not wholly new) for meeting the difficulty, I suggest that the County Board of Taxation in each county, establish local assessment districts to comprise the whole, or a part of

a municipality, or to include two or more municipalities and that such board appoint assessors for each district, who may be assigned to assist each other and who shall be chosen under the Civil Service Act and may be removed by the county board after a hearing. Proper salaries can be fixed, to be paid in the first instance by the county and apportioned to each taxing district according to the taxable valuations therein and by them paid to the county collector. The county board should establish rules to govern the work of the assessors, subject to approval and revision by the State Board of Taxation, so that uniform rules may be in force in all counties. I further suggest that tax lists be open to inspection by property owners before final confirmation and that an appeal lie to the county board from any proposed valuation, after which the revised and corrected assessment lists shall be filed with the taxing districts and the tax rate then struck upon the valuations so fixed. Appeals thereafter can be taken to the State Board, but only by those dissatisfied with the result of an appeal to the county board. This plan should result in securing a higher class of assessors, assure a fairer, more intelligent and equitable assessment and give relief to individuals and municipalities.

I recommend the repeal of the Hillery Maximum Tax Act. This act was passed for the benefit of the railroads, its object being to keep down local rates so that the average tax rate of the State, as applied to a portion of the railroad property, would be low. This law has so hampered municipalities that it was found necessary first to raise the maximum rate and later, under certain conditions, to permit an increase above this rate, and now the act only partially accomplishes its design and is obnoxious in principle. I believe that even the railroads are not now interested in it. In any event, it is my judgment that municipalities should be permitted to fix their rates at whatever they please. Any municipality which, through waste and extravagance, fixes too high a rate, will surely suffer, and its citizens can insist upon a new and more economical set of officials.

The law governing the taxation of shares of banks and trust companies is most unsatisfactory. The banks are investing their capital and surplus in exempt securities, largely, it would appear, for the purpose of escaping taxation, and while the market value of their shares has gradually increased, the tax derived from this form of property has grown less and in some instances has entirely disappeared. The money of depositors is seldom taxed and this money is the

bank's stock in trade—the commodity in which it deals—and upon which it realizes large profits for its shareholders. The banks should not be treated as individuals with regard to exemptions and a plan for taxation of its shares should be devised which would make this property bear a fair share of the tax burden. It is my intention to refer this subject to the Attorney-General at once for his advice as to a law to accomplish the desired result.

Our primary and election laws, on the whole, work admirably. The system is beyond the experimental stage and its great superiority over any previous method has been completely demonstrated. There should, however, be an improvement in the manner of selection of election officers. If the men in charge of polling places are ignorant or corrupt, we are bound to suffer from their incompetence or vices, and since we cannot, by law, make men intelligent or moral, we should exercise more care in the choice of those who are to perform this most important duty. This can be done through more stringent Civil Service examinations, and I would attract to these examinations, all State, county and municipal employees, by providing that such of them as qualify for election officers shall be excused from their public duties on registry, primary and election days, without loss of pay. Men employed in private business cannot, as a rule, be released by their employers and if my idea were adopted, an intelligent class of men would be available for this public work.

All political parties at their State conventions declared for a preferential system of voting at the primaries and I therefore feel it unnecessary to more than mention the subject and to express the hope that this will be one of the first matters to receive your attention.

In my recent travels about the State, I have been impressed with the importance of our farming industry and the necessity of furthering progressive and scientific development of agricultural pursuits, not for the benefit of our farmers alone, but for the urban communities as well. There has been a remarkable shifting of population from the country to the city and an encroachment of our cities upon the farm lands. I have seen it stated that about twenty-five per cent. of the population of New Jersey, is rural. This means that a great number of individuals must depend upon the few to furnish the food-supply for all and that the few have a diminishing number of acres upon which to raise their produce. In order that the rural portion of our State may produce sup-

plies for the balance, the best and most modern methods of agriculture should be at their command. The State Agricultural College at New Brunswick offers splendid courses in scientific farming to men and women, but we should carry this knowledge and instruction directly to the farm and the farmer. He should be shown by actual demonstration, appealing to his eye as well as his brain, how he can best use his lands. I favor giving instruction and practical demonstration in agriculture and home economics, under the supervision of the State College, to those who cannot attend this institution. The Federal government is seriously considering this subject, an appropriation from the national treasury to each State College having been proposed, and if we will join in the project a most important industry will receive an impetus beneficial to the whole State.

Previous Legislatures have thought it wise to require the Governor's approval of certain contracts entered into and expenses incurred by various departments and boards, as well as to plan for the construction of armories and State buildings. Nearly every Legislature has added to the number of items which must thus be brought to the Governor's attention and now there is a miscellaneous and burdensome assortment of contracts, bills and building plans requiring his approval to make them valid. The greater number of these are of no more importance than those that do not come to him. So large is their number and so varied their subjects, that it is impossible to make a thorough examination of all, and he must depend upon the advice and assistance of others, usually the head of the department from which they emanate, and as these documents come from and bear the approval of the department head, the Governor's approval is little more than a matter of form. I submit to you that the Governor should be permitted to devote his whole time and attention to the duties of the Executive Department and that the entire responsibility for the work of other departments should be placed upon the department heads. If you agree with me, I ask you to make the necessary change by legislation. If you do not, I shall give my best attention to this detail work.

The people of our State have chosen me as their Chief Executive and I enter upon my duties with a sincere determination to give them the best service of which I am capable. You and I are the representatives of our fellows, through whom their hopes and desires should be realized, and we must

be true to our trust. Differences in political beliefs must not affect our action and we should work in hearty accord. This should be the easier because we are not strangers. I have been closely associated with you in legislative service and my earnest hope is that the friendly relations now existing between us will continue even beyond our respective terms. My time and my assistance will always be at your command, as we strive together for the advancement and prosperity of our State.

JAMES F. FIELDER.

Message of Acting Governor Leon R. Taylor to the 138th Legislature.

By force of circumstances, I have been Acting Governor of this great State for the past few months, and as my occupancy of this office is, to some degree, accidental, I do not think it proper that I should, in this message to you, outline or detail policies or legislation that I deem important or necessary for the welfare of the State.

The people of the nation honored us by calling to the Presidency of the United States Governor Woodrow Wilson. When he took his office as President, he was succeeded by Governor Fielder, then President of the Senate. Answering the call of his party, Governor Fielder became a candidate for Governor, and, while technically not necessary, he followed tradition and resigned his office as Acting Governor prior to the election. The duties of the office thus devolved upon me, then the Speaker of the House of Assembly. To have been the acting executive of our great State, at a time when it had become one of the most progressive States of the Union, was indeed an honor, and I welcome this opportunity to address you and express the hope that by your acts, and the legislation you will consider and pass, you will preserve the record made in the last few years.

The eyes of the nation have been centered upon New Jersey since Woodrow Wilson became its Governor. The progressive reforms instituted during his term, as well as under the guidance of Governor Fielder, are too well known to require repetition.

These reforms are classed as progressive. They are generally accepted by the people of the State as being measures taken in the direction of progress and advancement. That they have met with popular approval is manifest to anyone who has followed the temper of the people.

In the campaign just closed, the platforms of all political parties pledged reforms in sympathy with those already instituted, as well as new policies in keeping with the progressive spirit and thought of the present day, and all such promises were made in the interest of progress and good government.

The members of the legislature are undoubtedly awake to the responsibility which the people have, by their suffrage, cast upon them. They demand that progress be continued; that progressive legislation be not retarded or forgotten. They look to you for the accomplishment of good government and expect a continuance of the new order of things that has been begun.

I shall be your Chief Executive for but one week after you assemble. The duties of this great office

will then devolve upon Governor Fielder; the administration of the State will be his, not mine, and in his inaugural address to you, he will call your attention to the things that he believes will require your attention. It is a matter of particular pride with me, however, that I have this opportunity to express to you my conviction that you will join with him in carrying out the policies which he has in mind, and which, I am sure, will enure to the great benefit of the State and the progress and betterment of its citizens.
